1 Conventions Used in this Document

- Keyboard sequences you press are shown in bold. Example: “Press **Tab** to move to the next field.”
- Links that display in blue on the Cisco Commerce homepage, whether underlined or not, are underlined in the user guide. Example: “On the Items tab, click Find Products.”
- Menu or sub-menu paths are separated by a “>”. Example: “**Select Intended Use > Managed Service.**”
- Tabs you click have no special formatting. Example: “Click the Items tab.”
- Buttons you click on the screen are shown in bold. Example: “Click **Continue**.”
- The labels on radio buttons, drop-down menus, checkboxes, and fields that correspond have no special formatting. Examples: “Click the Yes radio button.” “Click the Service Program drop-down menu.”
- When there are multiple ways of accomplishing a specific task, preferred methods are highlighted as follows:

The blue circle around a lower case “i” means *reader take note*. Notes contain helpful suggestions or reference to material not covered in the manual.

For example:

Best Practice: Search for an address before creating a new one. Add a shipping address only if the address is not found.

- Active hyperlinks to other documents or within the same document are shown in blue (RGB: 0, 0, 255) and underlined. Example: “Additional information is available in the [Getting Started with Cisco Commerce User Guide](#).” or “See [Creating an Order](#) for more details.”
- In sections describing a process that starts from somewhere other than the Cisco Commerce homepage, a process flow indicates how to get there. For example, you add products to a quote in the Quote tab, which means you would have already created the quote through the Deals & Quotes header tab. The following illustration would therefore display at the beginning of the Add Products to a Quote section.

2 Cisco Commerce Ordering Workflow

To understand how the ordering module fits within Cisco Commerce and the Cisco sales structure, see the [Getting Started with Cisco Commerce User Guide](#).

Using the ordering functionality, you can create standalone orders, place orders created from quotes, order services for previously purchased products, renew software subscriptions, view and pay invoices, view the status of orders, and manage returns.

Ordering Workflow

2.1 Creating an Order

In Cisco Commerce, you can create an order in two ways:

1. Converting an approved quote to an order referencing a deal ID

To convert a quote to an order, you must have access to the quote before you can convert it to an order. You can either:

- Convert a quote that you created to an order or,
- Convert a quote that was shared with you to an order using the Access Key

Convert Quote to an Order

Cisco Commerce: Create Order Page

2. Creating a standalone order with no reference to a deal ID

Create a Standalone Order

To create a standalone order, you do not need to have a deal ID. You can:

- Create standalone new order
- Clone (or copy) a new order from an existing order

Once the order is created and the order number or name and the web order ID number display at the top of the page, the process for populating order details and submission is the same no matter which of the above methods was used to begin.

2.2 Using Options on the Orders Tab

In Cisco Commerce, the Orders tab allows you to:

- Create an order
- Access shared order
- View Smart Account Orders
- View all or specific orders
- Tag orders

- Manage invoices
- Manage returns

Order Status (Unsubmitted)	
Web Order ID	Created Date
0478039	15 May 2017
0478006	12 May 2017
0478001	12 May 2017
test	11 May 2017

Options on the Orders Tab

2.3 Limited Access to the Orders Tab

Depending on your access levels, you may have limited view of the Cisco Commerce Orders tab.

2.3.1 Partner-initiated Customer Access

Partners who have a Partner-initiated Customer Access (PICA) contract with Cisco can grant PICA user privileges to end customers, providing limited access to Cisco Commerce.

If you are a PICA user, you will have access to limited functionality in the orders tab. You can:

- View submitted orders (no unsubmitted orders display)
- View only the Items and Shipping & Install tabs in an order
- Use only the export and print common utilities for an order, other options will display but are not enabled

The screenshot shows the PICA Order User Guide interface. At the top, there is a navigation bar with tabs: Catalog, Estimates & Configurations, Deals & Quotes, Orders, Services & Subscriptions, and Software. Below the navigation bar, there is a promotional banner for Cisco UCS, followed by a search bar and a sidebar with links for creating orders, viewing recent and shared orders, and managing invoices and returns.

PICA View of Orders Tab

The screenshot shows the PICA View of an Order page. It displays order details such as Sales Order ID, Purchase Order #, Account Manager, Deal ID, Program Type, and Web Order ID. Below the details, there are buttons for Export, Share, Delete, Print, Clone, and Add Dispute. The page is divided into sections for Items and Shipping & Install. A summary of line item status is provided, showing 0 items at each stage from Submitted to Completed. An option to Show Me is available for the completed stage.

PICA View of an Order

2.3.2 Internet Commerce Agreement

If you have not signed an Internet Commerce Agreement (ICA), you will not be authorized to submit orders and will receive notification in both:

- Order Initiation page
- Review and Submit tab

It is possible to create an order without signing the ICA, however the Submit Order button will be disabled on the Review and Submit tab.

Create an Order

⚠ Order submission disabled until Internet Commerce Agreement is signed. Order can be routed to an authorized submitter in the organization.

Items Discounts Shipping & Install Billing

Cisco Commerce Orders Page: Review and Submit Tab

3 Converting Quotes to Orders

You can convert your own quote to an order or a quote shared with you to an order. When you do so, standard contractual discounts will apply to the order and any nonstandard ones that are approved on the deal or quote.

If you make any changes to the items on the order, and need any nonstandard discount, then make the appropriate changes to the quote and submit it for re-approval. A quote to be converted to an order would need to be resubmitted for approval in the following cases:

- If a configuration is replaced with another configuration in the same product family, but the new price exceed variance limits
- If a configuration is replaced with another configuration outside of the original product family
- If services are added or removed from another family, other than what was originally approved
- If parts of the configuration is added or removed, other than in the original product family
- If needed parts are removed and defined as a spare

Best Practice: Accessing the Order page with a deal ID is recommended for deals associated with a Reusable Nonstandard Discount (RNSD) without trade-in products.

If you are placing product lease orders, select Lease and enter or select the Cisco Capital bill-to address and contact on the Quote tab. Product and service lease order capabilities are available through Cisco Commerce Orders tab.

3.1 Converting a Quote to an Order

To create an order from an approved quote, complete the following steps:

1. From the Cisco Commerce homepage, click **Create Order** from the Orders tab. The Order with Deal ID radio button is selected by default.
2. Click the Deal ID field and enter the appropriate deal ID.
3. If the deal was shared with you, enter the Access Key information from the email notification.

The screenshot shows the 'Create an Order' dialog box. At the top, there are two radio buttons: 'With a Deal ID' (selected) and 'Without a Deal ID'. Below this is a field labeled 'Deal ID *' with a placeholder 'Enter an existing Deal ID'. Further down is a field labeled 'Access Key' with a placeholder 'Enter Shared Deal Access Key'. At the bottom left of this field is a red circle containing the number '3'. At the very bottom of the dialog are 'Cancel' and 'Continue >' buttons.

Create an Order Page: With a Deal ID

4. Click **Continue**. The Order Initiation page populates with information from the quote, such as Intended Use and Billing Address.
5. Continue through the steps in the following document sections as applicable, beginning with [Verifying the Order Initiation Page Details](#).

3.2 Converting to Order from Within a Quote

You can also convert a quote to an order from within a quote itself.

To search for a deal that you have access to, complete the following steps:

1. From the Deals & Quotes tab, perform a basic search using any of the search parameters by clicking the drop-down arrow.

In this instance, enter the Deal ID in the search field.

The screenshot shows the 'Deals & Quotes' tab selected in the top navigation bar. A search bar is highlighted with a red box and a red circle containing the number 1. Below the search bar, a results table displays one item with Deal ID 22587252. A red box highlights the Deal ID column, and a red circle containing the number 3 highlights the specific Deal ID value '22587252'.

Deal Name	Deal ID	Quote ID	Next Action
Test Deal	22587252	4712778259	Submit

Deals & Quotes Tab: Search Using a Deal ID

2. Click **Search**. The deal displays.
3. Click the numerical deal ID link. The deal displays in the Review tab.

The screenshot shows the 'Review' tab selected in the top navigation bar of a quote page. A green box highlights a message at the top stating 'The quote has been approved and is ready for ordering. Create a new Order from this quote or see the order tab for more options'. A red box highlights the 'Create a new Order from this quote' link. A red circle containing the number 4 highlights this link.

Quote Page

4. Click [Create a new Order from this quote](#). The Order Initiation page displays.
5. Continue through the steps in the following document sections as applicable, beginning with [Verifying the Order Initiation Page Details](#).

3.3 Verifying the Order Initiation Page Details

Verify the information that populates automatically on the Order Initiation page. If any information needs to be changed, complete the steps in the following sections.

3.3.1 Deal ID, Order Name, Price List, Intended Use, and Managed Service Order

The order populates with some of the information from the quote itself. Follow the given steps to change editable options:

1. To change the deal ID, click the edit icon () next to it. The initial Create Order Page displays to enter the new deal ID.
2. Click **Continue**.
3. To add or change the order name, click the Order Name field and enter the appropriate information. This is optional.
4. The intended use defaults from the quote and is not editable.
5. To mark this order as a managed service order and indicate a managed service contractual provider, see [Managed Service Order from a Managed Service Quote](#).
6. Other fields on this page:
 - The price list defaults from the quote and is not editable.
 - To add or change the billing address and contact, see [Changing the Billing Address and Contact](#).
 - The shipping address, install site, and end customer address sections are not editable until the billing address is populated. See [Adding or Changing the Shipping Address and Contact](#), [Adding or Changing the Install Site](#), and [Adding or Changing the End Customer Address and Contact](#).

Create Order

Intended Use * RESALE	Managed Service Order? <input type="radio"/> Yes <input checked="" type="radio"/> No	Billing and End Customer * Billing Information * Billing Contact
Quote Name test trade in Quote		

Create Order Page Details

3.3.1.1 Managed Service Order from a Managed Service Quote

You can create a managed service order by converting a managed service quote. Managed service indicates that the deployment of your order is proactively monitored by a contractual provider.

Note: You can only view and change the contractual provider information for managed service orders on this page. This information will not display anywhere else in the Cisco Commerce Order process when a quote is converted to an order.

If Managed Service is the deal category on the original quote that is being converted, the Managed Service Order radio button will default to Yes and cannot be changed. The information about contractual provider defaults from the quote.

Create Order

* Required Field

Deal ID has been successfully validated and some of the fields are pre-filled using Deal information.

Order Name testquotemwl2	Deal ID 20402301
Intended Use * Managed Service	Price List * Global Price List EMEA Availability

Create Order Page: Managed Service Order

3.3.1.1.1 Changing the Managed Service Provider

The Managed Service (MS) Contractual Provider is the entity that provides the proactive monitoring of the deployment. To learn more about the Managed Service Contractual Provider, click the more information icon.

If a different Managed Service Provider is required, complete the following steps:

- From the Create Order page, click the pencil icon under Managed Service Contractual Provider. The Select Managed Service Contractual Provider dialog box displays.

The dialog box shows search terms 'D*' entered into the 'Partner Name' field. Below the search results, the 'developer' option is selected with a radio button.

MS Partner Name

Cancel Add Selected Partner

Select Managed Service Contractual Provider Dialog Box

2. Click the Country drop-down arrow to display the list of countries. Select the appropriate country. It is not a mandatory field, but narrows the search results to select the provider in the indicated country. Some providers may operate in multiple regions.
3. Enter a partial or complete provider name in the Partner Name field and click **Search**. To search using a wild card, enter a few letters of the partner name followed by an asterisk, for example, AB*. All partners with a name that begin with AB display in the Search Results section.
4. Click the radio button for the appropriate MS partner from the Search Results section. Once a radio button is selected, the Add Selected Partner button activates.
5. Click **Add Selected Partner** to continue. The order details get updated to reflect the changed provider.

3.3.2 Address Information Section

You can update the Billing, Shipping, Install Site, and End Customer addresses and contacts in this section. There are separate tabs for the Billing and End Customer, and Shipping and Install Site.

Note: Once the addresses are populated, additional links become active for copying addresses. For example, you can copy the shipping address to install site address section by clicking Copy Address to Install Site below shipping address section.

If the billing information was provided in the quote, the Billing Address and Contact populates automatically.

If not, then add the billing address and contact.

3.3.2.1 Changing the Billing Address and Contact

The billing address populates automatically from the quote. To change the billing address, complete the following steps:

1. From the Create Order page, click the edit icon under Billing Information. The Change Billing Information dialog box displays.
2. Click the appropriate radio button and click **Use Selected Address**. The dialog box closes and the Order Initiation page displays.
3. To add a contact, see the next section.

Change Billing Information

⚠ Changing the Billing Address will require you to re-select the Billing Contact, if Contact was already selected for this Order.

Select a Billing Address

Choose a Billing Address from the table below.

Company	Billing ID	Address	City	State/Provinc e	Zip/Postal Code	Country	Bill To Usage	Business Model	Operating Unit

Last Name *	Email Address *
	NOBODY@CISCO.COM
Phone Number *	

Edit Contact Dialog Box

3. Ensure the correct radio button is selected and click **Use Selected Contact**.
4. To create a contact for this address, click **Create Contact** from the Select Contact dialog box. The Create Contact dialog box displays.

Populate the required fields, indicated with a red asterisk (*).

Click **Create**. The dialog box closes, and the contact information displays on the Create Order page.

The screenshot shows the 'Create Contact' dialog box. It has a title bar 'Create Contact' with a close button 'X'. Below it, there's a note: 'Attn:Receiving - or - Enter a new contact below.' A section titled 'Contact' contains fields for 'First Name *' (with a placeholder 'John'), 'Fax Number' (disabled), 'Last Name *' (placeholder 'Doe'), 'Email Address *' (placeholder 'johndoe@cisco.com'), and 'Phone Number *' (placeholder '+1 555 555 5555'). At the bottom are buttons for 'Cancel', 'Back', and 'Create'.

Create Contact Dialog Box

5. Alternatively, to create a contact titled Attn: Receiving, check the checkbox on the top left of the Create Contact dialog box. The system greys out the contact information fields and no other contact information is required.

3.3.2.1.2 Changing a Contact

You are able to change the identified billing contact.

The screenshot shows the 'Billing Contact' details for 'CELINE DARDE'. It includes an edit icon (a pencil inside a red square) with a red circle containing the number '1' above it. Below the name are icons for email ('NOBODY') and phone ('+352'). There is also a printer icon at the bottom.

Billing Contact Details

1. Click the edit icon. The Select Contact dialog box displays.
2. Click the appropriate radio button and click **Use Selected Contact**.

It is also possible to edit existing contact information and create a new contact (see [Adding, Editing, or Creating a Contact](#)).

3.3.2.2 Adding or Changing the Shipping Address and Contact

3.3.2.2.1 Adding or Changing the Shipping Address

Best Practice: Search for an address before creating a new one. Create a shipping address only if the address is not found.

To add or change the shipping address, complete the following steps:

- From the Create Order page, click the Shipping and Install Site tab, then click **Add a Shipping Address** or the edit icon if it is already populated. The Address Search dialog box displays.
Click the delete icon if you wish to delete the already populated address.
- To choose a favorite address, click the appropriate address radio button.
- Click **Use Selected Address**.

Site Use ID	Company	Address	City	State/Province	Zip/Postal Code	Country
419324955	PRICE SARL	400 ROUTE	LUXEMBOURG		1471	LUXEMBOURG

2. Populate the required fields, indicated with a red asterisk (*).
3. If applicable, check the Add to Favorites checkbox.
4. Click **Create**. The dialog box closes, and the address populates on the Order Initiation page.

The screenshot shows the 'Create Address' dialog box. It contains fields for Country (United States), Customer Company Name, Address 1, Address 2, Address 3, Address 4, State/Province (dropdown menu showing '--Select--'), City, Zip/Postal Code, and an 'Add to Favorites' checkbox. The 'Add to Favorites' checkbox is highlighted with a red circle containing the number 3. The 'Create' button at the bottom right is also highlighted with a red circle containing the number 4.

Create Address Dialog Box

3.3.2.2.3 Adding, Changing, or Removing a Shipping Contact

The steps for adding, changing, or removing a shipping contact are the same as adding, changing, or removing any contact. To add, change, or remove a contact under the Shipping Address, see [Adding, Editing, or Creating a Contact](#) and [Changing a Contact](#).

3.3.2.3 Adding or Changing the Install Site

Adding the install site or contact and changing it is same as [Adding or Changing the Shipping Address and Contact](#).

Note: The install site country and install site contact must be added to order services. For resale orders, add a full install site address.

To change the install site address once it is populated, click the edit icon. A dialog box displays. Click the radio button corresponding to the appropriate install site address and click **Use Selected Address**. The dialog box closes.

Note: If the buy method is a distributor, and if the distributor bill-to ID (BID) and the site ID of a quote line belong to different country pricelists, then Multi-National Quoting (MNQ) discounts are applicable for the country pricelist of the install site country. The MNQ discount is applied systematically so no manual process is needed.

The screenshot shows the 'Billing and End Customer' section. On the left, there's a sidebar with 'Billing and End Customer*' and 'Shipping and Install Site'. The main area has two sections: 'Shipping Address' and 'Install Site'.
Shipping Address: Contains fields for 'Site Use ID' (133), 'Address' (LUXEMBOURG 1471, LUXEMBOURG), and a 'Copy Address to' dropdown with options 'Install Site' and 'End Customer'.
Install Site: Contains a field for 'Address' (LUXEMBOURG) and a 'Copy Address to' dropdown with options 'Shipping Address' and 'End Customer'.
Shipping Contact: A dashed box with a '+ Add a Contact' button.

Install Site

3.3.2.4 Adding or Changing the End Customer Address and Contact

The end customer information automatically populates from the quote and can be modified. Adding and changing the end customer address and contact is same as [Adding or Changing the Shipping Address and Contact](#).

3.3.2.4.1 Adding or Removing End Customer Note

The Add note to end customer can be used to input any note, such as the Purchase Order (PO) number or the contract number. The note is printed on shipping labels and is displayed in the View Status of an order.

To input a note, complete the following steps:

1. Select Add note to end customer. The Add Note dialog box displays.

The dialog box shows 'End Customer *' with fields for 'Site Use ID' (200) and 'Address' (LUXEMBOURG 1471, LU). To the right is the 'End Customer Contact' section, which includes a '+ Add a Contact' button and a red box highlighting the 'Add note to end customer' button, with a red circle containing the number '1' above it.

End Customer: Add Note

2. Type required text and click **Save**.
3. To edit the note, click Edit Note. The Edit Note dialog box displays.
4. Replace the existing note with the new text and click **Save** to update it.

5. Click **Remove Note** to delete it altogether.

3.4 Completing the Conversion

When converting a quote to an order, you can select specific items from the quote or purchase all items from the quote in a single order.

To complete the conversion, complete the following steps:

1. Ensure that you have populated all the required sections on the Create Order page.
2. To choose some of the items from the quote to place on the order, click **Select Items to Order**. The Select Items page displays.
3. Check the appropriate checkbox(es). Click **Continue**.

Order Initiation Page: Options for Converting a Quote to an Order

4. Alternately, click [Split](#) to order a partial quantity of the item. The Split Quantity dialog box displays.

Select Items

Deal ID 20402328
Deal/ Opportunity Name testquotemwl3
Order Name testquotemwl3

Select the items to add to your order below. When you are finished, click Continue.

Enter part number to search [Show all items](#)

CISCO2911/K9	Cisco	1	Remove

[Cancel](#) [OK](#)

Split Quantity Dialog Box

8. To order all of the items included on the quote, click **Order Entire Quote**.

9. In both cases, an order is created. The Order page: Items tab displays. The order number/name, the web order ID number, and status display at the header level. See [Populating the Header Content](#). Expand the header to see additional information.
10. Alternatively, to cancel the conversion, click [Back to Quote](#). The quote opens to the Quote page: Review tab.

The screenshot shows the Order page with the 'Items' tab selected. At the top, there's a header with 'ORDER NAME: testquotemwl3' and 'PURCHASE ORDER #: 67671960'. Below the header, there are tabs for 'Items', 'Discounts', 'Shipping and Install', 'Billing', and 'Review and Submit'. A red box highlights the 'Back to Quote' button. On the right side of the header, there are links for 'Export', 'Print', 'Email', 'Share', 'Delete', and 'More'. Below the tabs, there's a section for 'Set preferences for this order' with buttons for 'Check Local Validations', 'Save', and 'Save and Continue >'. There's also a link 'Add More Items From Quote | Edit Configuration'. At the bottom, there are buttons for 'Remove from Order', 'Validate', and 'Assign Smart Account'. A filter bar allows 'Show All Items'.

Order Page: Items Tab: Quote Converted Order

3.4.1 Using the Conversion Options on the Items Tab

From the Order page: Items tab, you can:

- View the remaining line items on the quote and add additional items to the order from the quote
- Enable the line items on the order converted from the quote for editing

The screenshot shows the Order page with the 'Items' tab selected. It's similar to the previous screenshot but lacks the red box around the 'Back to Quote' button. The 'Add More Items From Quote | Edit Configuration' button is highlighted with a red box.

Order Page: Items Tab – Conversion Options

3.4.1.1 Adding More Items from the Quote

From the Order page: Items tab, you can opt to add more items to the order from the original quote.

To add more items from the quote, complete the following steps:

1. Click [Add More Items From Quote](#). The Items tab refreshes with the line items from the quote.
2. Check the appropriate checkbox(es).

3. Click **Add to Order**. The additional items from quote are added as line items to the order.

3.4.1.2 Enabling Editing for the Converted Line Items

When line items are converted from a quote to an order, the configuration is not editable by default. The Select Options and Select Service (Change Service/Subscription if options already selected) links are disabled.

The screenshot shows the Order Page with the 'Items Tab - Line Items' selected. At the top, there are buttons for 'Add More Items From Quote', 'Edit Configuration' (which is highlighted with a red box and has a circled '1' above it), 'Remove from Order', 'Validate', and 'Assign Smart Account'. Below these are 'Filter By' and 'Show All Items' dropdowns. The main area displays a table of line items. The first item is '1.0 WS-C6506-E=' with a description: 'Catalyst 6500 Enhanced 6-slot chassis,11RU,no PS,no Fan Tray ECCN 5A991'. The table columns include: P.O. Line Reference, Lead Time, Unit List Price (USD), Qty, and Ext. List Price (USD). At the bottom of the table, it says 'Valid as of 23-Feb-2016 03:04 EST'. Below the table are buttons for 'Select Options', 'Select Service', 'Validate', 'Add Note', and 'More Actions'.

Order Page: Items Tab - Line Items

To enable the links to edit the configuration, complete the following steps:

1. Click Edit Configuration. The Edit Configuration dialog box displays.

Edit Configuration Dialog Box

2. Click **Ok** to continue. The Order page refreshes with the Change Options and Select Service links enabled.

The screenshot shows the Order Page: Items Tab - Line Items (With Enabled Links). The table lists two line items:

	Hardware, Software and Services	P.O. Line Reference	Lead Time	Unit List Price (USD)	Qty	Ext. List Price (USD)
<input type="checkbox"/>	1.0 WS-C6506-E= Catalyst 6500 Enhanced 6-slot chassis,11RU,no PS,no Fan Tray ECCN 5A991		21 days	5,500.00	2	11,000.00
<input type="checkbox"/>	2.0 CISCO2911/K9 CP Cisco 2911 w/3 GE,4 EHWIC,2 DSP DRAM,IPB ECCN 5A002.A.1		21 days	3,189.03	3	9,567.09

Actions available for each item include:

- Select Options
- Select Service
- Validate
- Add Note
- More Actions
- Replace Configuration (highlighted with a red box and circled number 3)

Order Page: Items Tab - Line Items (With Enabled Links)

3. Additionally, the Replace Configuration link is also enabled (see [Replacing the Configuration](#)).
4. Alternatively, click **Cancel** to return to the previous page without enabling the line items.

Note: Editing the configuration may require the quote to be modified and reapproved to receive nonstandard discounts. See [Converting Quotes to Orders](#).

3.4.1.3 Replacing the Configuration

Once the converted line items are enabled for editing, Replace Configuration is enabled. Use this option to replace a specific line item with a compatible line item. Applicable discounts are automatically applied. See [Converting Quotes to Orders](#) for details on when nonstandard discounts are not applied.

To replace a line item with another compatible item on the order, complete the following steps:

1. From the Order page: Items tab, add the replacement item(s) to your order (see [Adding Items to the Order](#)).
2. Click Replace Configuration. The Items tab refreshes, displaying a list of compatible items for the indicated SKU.

Items Discounts Shipping and Install Billing Review and Submit

Compatible Items for SKU - CISCO2911/K9. Please select a Configuration to continue.

Hardware, Software and Services	P.O. Line Reference	Lead Time <small>i</small>	Unit List Price (USD)	Qty	Ext. Price List (USD)

Replace Back

Order Page: Items Tab - With Error Message

3. Click the radio button that corresponds to the appropriate SKU from the same Product Family and click **Replace**.
4. The Replace Configuration dialog box displays. Click **Continue**. The configuration is replaced on the items page of the Order with the selected configuration.

Replace Configuration Dialog Box

3.4.2 Using Additional Links on the Converted Quote Items Tab

Other than [Back to Quote](#), [Adding More Items from the Quote](#), and [Replacing the Configuration](#), the processes for creating an order with or without a deal ID are the same from the Order page.

Continue to [Populating the Order Details](#) for instructions on using the additional options available, such as adding or removing items, adding service/subscriptions for previously purchased products, check remanufactured availability, and others.

4 Creating a Standalone Order

To create a standalone order, complete the following steps:

1. From the Cisco Commerce homepage, click **Create Order** from the Orders tab. The following page displays.

The screenshot shows the 'Create an Order' page. At the top, it says 'Create an Order' and 'Required Field'. There are two radio buttons: one selected for 'With a Deal ID' and one unselected for 'Without a Deal ID' (which is highlighted with a red box). Below each radio button is a field: 'Deal ID *' with placeholder 'Enter an existing Deal ID' and 'Access Key' with placeholder 'Enter Shared Deal Access Key'. At the bottom, there are 'Cancel' and 'Continue >' buttons.

Create Order Page

2. Click the Without a Deal ID radio button.
3. Click **Continue**. The Create Order page populates with information from the default preferences set within My Profile and Preferences.
4. Continue through the steps in the following document sections as applicable, beginning with [Verifying the Create Order Page Details](#).

4.1 Verifying the Create Order Page Details

Verify the information that populated automatically on the Create Order page from My Profile and Preferences. See [Getting Started with Cisco Commerce User Guide](#) for information on setting default preferences.

Refer to the sections ahead to change any information populated automatically.

4.1.1 Order Name, Intended Use, and Managed Service Order

Populating the Create Order page details is the same as populating these details when a quote is converted to an order. See the relevant parts of [Deal ID, Order Name, Price List, Intended Use, and Managed Service Order](#) section.

The screenshot shows the 'Create Order' section of the Order Initiation Page. It includes fields for Order Name, Deal ID, Intended Use (Resale), Price List (Global Price List in US Dollars), and Managed Service Order? (Yes/No).

Order Initiation Page

To mark this order as a managed service order and indicate a managed service contractual provider, click the Yes radio button below the Managed Service Order? section on the Order Initiation page. Click Select Provider to select the Managed Service Contractual Provider. The steps from here on are same as [Changing the Managed Service Provider](#).

4.1.2 Address Information Section

In the Address Information section, you can update the address and contacts for billing, shipping, install site, and end customer.

1. To add or change a billing address and contact, see [Changing the Billing Address and Contact](#).
2. The shipping address, install site, and end customer sections are not editable until the billing address is populated (see [Adding or Changing the Shipping Address and Contact](#), [Adding or Changing the Install Site](#), and [Adding or Changing the End Customer Address and Contact](#)).

The screenshot shows the Address Information Section of the Order Initiation Page. It includes tabs for Billing and End Customer, Billing Information, and Billing Contact. The Billing Information tab shows details like Billing ID, CID, Operating Unit, and Address. The Billing Contact tab shows details like Name, Email, and Phone. The End Customer tab has a link to Add a Full End Customer.

Order Initiation Page: Address Information Section

4.2 Completing the Order Initiation Page

Prior to creating the order, complete all required sections on the Create Order page.

1. To create the order, click **Continue**.
2. The order is created. The order name and web order ID number, among other information, display on the header. You can edit the order name, if required.

ORDER NAME mw1	PURCHASE ORDER # * 68388600	STATUS UNSUBMITTED	SMART ACCOUNT Assign Smart Account		
Items	Discounts	Shipping and Install	Billing	Review and Submit	
Set preferences for this order			Check Local Validations	Save	Save and Continue >

Order Page: Header Details

4.3 Adding Products and Services to the Order

Prior to adding products and services, consider if any of the information at the top of the Order page (order name, purchase order number) needs to be updated. See [Populating the Order Details](#) as applicable.

To add products and services, see [Adding Items to the Order](#) and [Adding Services](#).

5 Creating Orders from Existing Orders

You can create new orders from existing orders in Cisco Commerce. To create a cloned order,

- Unsubmitted orders need to be marked as a "favorite" before they can be cloned.
- Submitted orders can be cloned, even if they are not marked as a favorite.

5.1 Creating a Cloned Order from a Favorite Order

It is possible to create a clone of an order previously marked as a favorite order (see [Marking Order as a Favorite](#) for more information about favorite orders).

Alternatively, you can search for a favorite order under the Orders tab from Cisco Commerce homepage (see [Searching for an Order](#)).

To create a clone of a favorite order, complete the following steps:

- From the Cisco Commerce homepage, click Orders tab> Create Order. The following initial Order page displays where you can look up or view favorite orders.

Create Order Page

- Click the Enter Order Name field, and begin entering the order name. The field expands to a drop-down menu, displaying the favorite order names that match the entered characters. Click the appropriate order. The order name displays in the Order Name field.
- Alternatively, click [View your favorite Orders](#).
- The View My Favorite Orders dialog box displays.

You can search using the order name in the search field or select from the list of previously added favorites that display in the All Favorites section.

View My Favorite Orders Dialog Box

5. Click the appropriate Order Name radio button. Click **Continue**.
6. The order name displays in the Order Name field.

Create Order Page: Order Name Refreshed

7. Click either the With a Deal ID radio button or the Without a Deal ID radio button.
8. Click **Continue**. The new order is created matching the order details from the favorite order. The Order page: Items tab displays.
9. Edit the order as applicable. See [Adding Items to the Order](#).
10. Submit the order. See [Reviewing and Submitting the Order](#).

5.2 Creating a New Order by Cloning an Order

Cisco Commerce

Orders Tab

Open an Active Order

Order Page: Items Tab

When you create and configure an order, that order can be instantly cloned for editing and/or reuse.

To clone an already created order, complete the following steps:

- From the Order page: Items tab of a created order, click **Clone Order**. The initial Order page displays (similar to after clicking **Create Order** from the Cisco Commerce Orders tab).

The screenshot shows the Cisco Commerce Order interface. At the top, there's a navigation bar with links for Catalog, Estimates, Deals & Quotes, Orders (which is the active tab), Services & Subscriptions, Software, and Notifications. Below the navigation bar is a toolbar with icons for Favorites, Export, Print, Email, Share, Delete, and More. The main area displays an order summary for 'Order-80478461'. The order details include Purchase Order # (80478461), Web Order ID (80478461), Status (UNSUBMITTED), and Smart Account (Assign Smart Account). Below the summary are tabs for Items, Discounts, Shipping and Install, Billing, and Review and Submit. A 'Set preferences for this order' section is at the bottom. On the right side, there's a context menu with options like Save as Estimate, Clone Order (which is highlighted with a red box and circled with a red number '1'), Manage Contract Access and Email Recipients, and Global settings. Buttons at the bottom right include Check Local Validations, Save, and Save and Continue.

Order Page: Items Tab

- Click either the With a Deal ID radio button or the Without a Deal ID radio button.
If applicable, click the Deal ID field and enter the appropriate information.
- Click **Continue**. The new order is created matching the order details from the cloned order. The Order page: Items tab displays.

The screenshot shows a 'Create an Order' dialog box. It has two radio buttons: 'With a Deal ID' and 'Without a Deal ID', with 'Without a Deal ID' selected. Below is a checkbox labeled '(Optional)' next to 'Clone an Order'. An input field for 'Order Name' contains 'demo'. A green message box at the bottom says 'You may clone and edit the selected order: demo(67670028) Click Continue to proceed.' A note below states 'IMPORTANT: You can only clone Favorite Orders in this view. Cloning doesn't duplicate Order Discounts and Ship Dates.' At the bottom are 'Cancel' and 'Continue >' buttons, with the 'Continue >' button circled with a red number '3'.

Create Order Page: Clone an Order Page

4. Edit the order as applicable. You can add or remove items, if required. See [Adding Items to the Order](#).
5. Submit the order. See [Reviewing and Submitting the Order](#).

6 Populating the Order Details

Regardless of the method used to create an order, populating order details remains same, unless otherwise noted.

Populating the order details includes the following:

- Reviewing and updating the header content of an order
- Assigning smart account to the order
- Adding or removing items to the order
- Resolving issues
- Adding or removing services to the order
- Renewing software subscriptions
- Reviewing and managing discounts
- Setting shipping and installation information
- Verifying billing information
- Reviewing and submitting the order

6.1 Populating the Header Content

6.1.1 Expanding or Collapsing the Header Section

The order name, purchase order number, web order ID number, order status, and smart account information displays at the header level on top of the page.

To display the full header content, click the Show Order Details icon. The header expands and the following additional information displays: the deal ID number, the deal name, created and last modified by information, and the quote status. To collapse the header section to show less information, click the Hide Order Details icon.

The screenshot shows the 'Order Page: Items Tab' interface. At the top, there's a navigation bar with icons for Favorites, Export, Print, Email, Share, Delete, and More. Below this is a header section with fields for ORDER NAME (Test Order), PURCHASE ORDER # (67684885), WEB ORDER ID (67684885), STATUS (UNSUBMITTED), and SMART ACCOUNT (Assign Smart Account). The STATUS field has a red border. Below the header, there are sections for CREATED BY (m on 26-Feb-2016), LAST UPDATED BY (m on 26-Feb-2016), DEAL ID (Not Applicable), DEAL NAME (Not Applicable), and QUOTE STATUS (Not Applicable). A 'Hide Order Details' button is located in the DEAL NAME section, with a red box drawn around it. At the bottom of the header section, there's a 'Show/Hide Order Details' button with a red box around it. Below the header, there are tabs for Items, Discounts, Shipping and Install, Billing, and Review and Submit. A 'Set preferences for this order' dropdown is on the left, and 'Check Local Validations', 'Save', and 'Save and Continue' buttons are on the right.

Order Page: Items Tab – Show/Hide Order Details

Note: Throughout the order process, there are messages at the top of the page that guide you through.

- When additions are successful, the message is **green**.
- When there is additional information to note, the message is **blue**.
- Warning messages that indicate additional tasks may be needed display in **yellow**.
- Error messages that must be resolved are in **red**.

6.1.2 Changing the Order Name in the Header

To change the order name, complete the following steps:

1. Click the edit icon next to the already populated order name.
2. Enter the new name in the field.
3. Click Update.

Global Price List in US Dollars (USD)				
ORDER NAME Test Order 				
PURCHASE ORDER # *	WEB ORDER ID 67684885	STATUS UNSUBMITTED	SMART ACCOUNT Assign Smart Account	
CREATED BY m on 26-Feb-2016	LAST UPDATED BY m on 26-Feb-2016	DEAL ID Not Applicable	DEAL NAME Not Applicable	QUOTE STATUS Not Applicable

Order Page: Order Name

6.1.3 Entering the Purchase Order (PO) Number

Entering a PO number is mandatory prior to submitting the order. Purchase Order #* displays at the top of the page.

To enter the PO number, complete the following steps:

1. Click the edit icon. The Purchase Order # field becomes active.
2. Click the Purchase Order # field and enter the purchase order number.
3. Click Update.
4. Once the Purchase Order # field is populated, you can still change the information. To change the PO number, repeat steps 1-3.

ORDER NAME Test Order 		
PURCHASE ORDER # *	WEB ORDER ID	STATUS
<input type="text"/>	67684885	UNSUBMITTED
Update/Cancel		

Order Page: Purchase Order Field

6.1.4 Marking Order as a Favorite

You can mark a submitted or unsubmitted order as a favorite order, allowing you to easily access it for cloning when creating future orders.

Note: ‘Favorite’ orders are specific to users and will not be automatically saved universally to all those with access to that order. If more than one person has access to a single order, all users with access to the specific order will need to separately mark the order as a favorite in their log in.

To mark an order as a favorite, complete the following steps:

1. Create an order, or search for and open an existing order. See [Creating an Order](#) or [Getting Started with Cisco Commerce User Guide](#) to perform a search using the Cisco Commerce homepage.
2. From the Order page: Items tab, click Favorites. The Mark as Favorite dialog box displays.

Global Price List in US Dollars (USD)			
ORDER NAME Test Order 	PURCHASE ORDER # * 	WEB ORDER ID 67684885	STATUS UNSUBMITTED
CREATED BY m on 26-Feb-2016	LAST UPDATED BY m on 26-Feb-2016	DEAL ID Not Applicable	SMART ACCOUNT Assign Smart Account
DEAL NAME Not Applicable	QUOTE STATUS Not Applicable		

Order Page: Items Tab – Mark Order as Favorite

Mark as favorite
Do you want to add this order to favorite list?
No Yes

Mark as Favorite Dialog Box

3. Click **Yes**. The order is saved as a favorite.
4. The Favorites star is now yellow, indicating the order is saved as a favorite.

Order Page: Items Tab – Order Marked as a Favorite

5. Alternatively, click No on the Mark as Favorite dialog box to return to the order without marking it as a favorite.

Once an existing order is marked as a favorite, you can create a new order out of it. See [Creating a Cloned Order from a Favorite Order](#).

6.2 Adding Items to the Order

There are several ways to add items to an order:

- Finding items using a search (see [Finding Items Using a Search](#))
- Adding items by SKU (see [Adding Items by SKU](#))
- Importing an estimate (see [Importing an Estimate](#))
- For information on importing a BOM, see the [CCW Quote User Guide](#)

Alternatively, to continue with the order, click **Save and Continue**. The Discounts tab displays.

6.2.1 Finding Items Using a Search

Searching for products allows you to add multiple products to the order at one time. There are three options for finding items using a search:

- Search and add by product description or SKU (search by product description or SKU if a specific SKU or portion of the product description is available): see [Search and Add by Product Description or SKU](#).
- Search and add by product family (search by product family to find the product by scanning through a list of Cisco product families): see [Search and Add by Product Family](#).
- Search and add by solution: see [Search and Add by Solution](#).

Best Practice: If you know the product family, then use the Search and add by product family option. It makes the search easier.

6.2.1.1 Search and Add by Product Description or SKU

To search for items to add to the order, complete the following steps:

- From the Order page: Items tab, click Find Products and Solutions. The Find Products page displays.

ORDER NAME: test order
PURCHASE ORDER #: * WEB ORDER ID: 67684886 STATUS: UNSUBMITTED SMART ACCOUNT: Assign Smart Account

Global Price List in US Dollars (USD)

Global Price List - US (USD) ⓘ

Product Description or SKU Enter Product Description or SKU Search ④

Please provide input in English

Find Products & Solutions Page: Search By - Product Description or SKU

- Check the checkbox(es) to display only Trade Agreements Act (TAA) compliant products and/or products that are eligible for a Value Incentive Program (VIP).

Note that TAA displays only for US Federal orders. For more information, view the [TAA page](#).

- In the search field, enter a product description, SKU, or partial SKU, and click **Search**.

You do not need to enter the entire SKU. For example, to display all search results for the Cisco 1800 Series Integrated Service Router, enter CISCO1803. All of the Cisco 1803 SKUs display.

The page refreshes to display the results.

- Locate the appropriate product(s).
- Click . The product is added to the Selected Items cart.
- Click the Qty field and enter the appropriate quantity.

Note: There are several ways to enter or change the quantity for a product.

- As listed in step 7 above (entering the quantity in the Selected Items cart).
- Locate the appropriate product (step 5). Click the Qty field and enter the quantity. Continue to step 6 (entering the quantity before adding the product to the Selected Items cart).
- On the Order page: Items tab (see [Setting Quantities for Products](#)).

8. Repeat steps 3 - 7 to populate the items in the order.
9. To remove unwanted items from the Selected Items cart, click [Remove](#).
10. When you have added all the desired products from the search to the Select Items cart, click **Add**.
The Order page: Items tab displays with the new line(s).

Find Products & Solutions Page: Search Results

6.2.1.2 Search and Add by Product Family

To search by product family, complete the following steps:

1. From the Order page: Items tab, click [Find Products and Solutions](#). The Find Products and Solutions page displays.
2. Click the Product Family radio button.
3. Check the checkbox(es) to display only Trade Agreements Act (TAA) compliant products and/or products that are eligible for a Value Incentive Program (VIP).

Note that TAA displays only for US Federal orders. For more information, view the [TAA page](#).

Find Products & Solutions Page: Search By – Product Family

4. Click the Type to filter or click menu button drop-down arrow to see a full list of product families.
5. Scroll through the list and click the desired product family.
If you wish to search using a wild card, enter a few letters of the product name followed by an asterisk (for example, ABCD*). All SKUs that begin with ABCD will display in the Search Results section.
6. Click **Search**. Results display all applicable product families.
7. Locate the appropriate product(s).
8. Click  . The product is added to the Selected Items cart.
9. Click the Qty field and enter the appropriate quantity.

Note: There are several ways to enter or change the quantity for a product.

- As listed in step 9 above (entering the quantity in the Selected Items cart).
- Locate the appropriate product (step 7). Click the Qty field and enter the quantity. Continue to step 8 (entering the quantity before adding the product to the Selected Items cart).
- On the Order page: Items tab (see [Setting Quantities for Products](#)).

10. Repeat steps 4–9 to populate the items in the order.
11. When all desired products from the search have been added to the Select Items cart, click **Add**.
The Order page: Items tab displays with the new line(s).

6.2.1.3 Search and Add by Solution

To search by solution, complete the following steps:

1. From the Quote tab: Items sub-tab, click [Find Products & Solutions](#). The Find Products & Solutions page displays.
2. Click the Solution radio button.
3. Click [View All Solutions](#) to see a full list of solutions.
4. Browse through the Main Category and Sub Categories to find your desired solution.
5. Alternately, begin typing a Solution Identifier/Name in the Search field. Select the desired solution from the drop-down.
6. Once you've selected the desired solution, click **View Components** to view the associated SKUs.

Find Products & Solutions Page: Search By – Solution

6.2.1.4 Using the Lead Time Functionality

The Lead Time Search functionality allows you to obtain lead time information for both major and minor lines. A lead time of a particular product or minor line option is the amount of time from order placement to product shipment. It is possible to search for lead times by product family, product SKU, product

description, or a wild card search. You can then download or email the lead time information in either an Excel or PDF format.

You can access the lead time tool in Quick Links also. Refer to the [Getting Started with Cisco Commerce User Guide](#) to perform a lead time search.

6.2.2 Adding Items by SKU

To add items to the order by entering an SKU, complete the following steps:

1. On the Order page: Items tab, click the Search by SKU, Description, or Product Family field and enter at least three letters or numbers of a SKU. A drop-down menu displays items with matching SKUs.

Part Number	Description	Product Family	List Price
CISCO2911-K9	Cisco 2911 w/3 GE,4 EHWIC,2 DSP,1 SM,256MB CF,51 Cisco 2900 Series Integrated Services Routers 2MB DRAM,IPB	Cisco 2900 Series Integrated Services Routers	2695.0
CISCO2911-V/K9	Cisco 2911 Voice Bundle, PVDM3-16, UC License PA China Collaboration Breakaway Plus Four K, FL-CUBE10		3595.0
CISCO2911-DC/K9-WS	Cisco2911 w/3 GE,4EHWIC,2DSP,1SM,256MB CF REF URBISHED		3245.0
CISCO2911-SECK9-RF	Cisco 2911 Security Bundle w/SEC license PAK REMANUFACTURED		2169.0

Order Page: Items Tab – Add Product Item

To search using a wild card, enter a few letters of the product name followed by an asterisk (for example, ABCD*). All SKUs that begin with ABCD will display in the Add Product Item drop-down menu that populates.

2. Scroll down the drop-down menu and click an appropriate product.

Note: To locate products that are orderable but not published on the indicated price list, enter the full SKU and press Enter. If the SKU is still not found, then the standard process to address errors applies.

Prior to contacting support, verify that the SKUs cannot be located via the auto-populate, wild card search, or general Cisco Commerce search functionalities and that the SKU in question has been published to the price list selected on the order.

3. Click the Qty field and enter an appropriate quantity.
4. Click **Add**.
5. A green message displays, indicating that the part was added successfully. A new line displays the added item.
6. To continue adding lines, click **Save**. The page remains unchanged, and additional lines can be added by repeating the above process.
7. To remove a line, check the appropriate checkbox.
8. Click **Remove from Order**.

The screenshot shows the 'Items' tab of the Cisco Order Management system. At the top, there are tabs for 'Items', 'Discounts', 'Shipping and Install', 'Billing', and 'Review and Submit'. Below the tabs, there's a section for 'Set preferences for this order' with buttons for 'Check Local Validations', 'Save', and 'Save and Continue'. A green success message box says 'Items added successfully to your order'. The main area shows a table of items:

	O. Line Reference	Lead Time	Unit List Price (USD)	Qty	Ext. List Price (USD)
<input type="checkbox"/> 1.0 ONS-CCC-10G-5s CXP-CFP MPO cable, 5m long ECCN EAR99	28 days	700.00	1	700.00	
<input checked="" type="checkbox"/> 2.0 UBR-MC88V-RF REFRESH UBR7200 DOCSIS3.0ModemCrd.8DS w/Upx,8US,SCDMA REMANUFACTURED ECCN 5A991	Not Applicable	39,270.00	1	39,270.00	

Below the table, there are buttons for 'Select Options', 'Select Service', 'Validate', 'Add Note', and 'More Actions'. A red box highlights the checkbox for the second item (ONS-CCC-10G-5s), and a red circle with the number 7 is placed over it.

Order Page: Items Tab – Remove From Order

6.2.3 Importing an Estimate

Another way to add products to the order is to import a saved estimate. Cisco Commerce Orders tab allows for saved estimates and BOMs to be imported into the order. Access the different tools via the Import Saved Configuration dialog box.

The screenshot shows the 'Items' tab of the Cisco Order Management system. At the top, there are tabs for 'Items', 'Discounts', 'Shipping and Install', 'Billing', and 'Review and Submit'. Below the tabs, there's a section for 'Set item preferences for this order' with a 'Continue >' button. The main area shows a table of items:

	P.O. Line Reference	Lead Time	Unit
<input type="checkbox"/> Hardware, Software and Services			

A red box highlights the 'Import a Saved Configuration' button in the 'More Actions' dropdown menu.

Order Page: Items Tab – Import a Saved Configuration

BOM Upload	BOM Upload is used for adding multiple spares to the order. See Uploading a BOM

6.2.3.1 Importing an Estimate

You can save a configuration from an order and then import that saved configuration, or estimate, into another order.

To import an estimate, complete the following steps:

1. From the Order page: Items tab, click to expand the More Actions drop-down menu and then click Import a Saved Configuration. The Import Saved Configuration dialog box displays.
2. Click **Select** next to Estimate. The Import Estimate page will load.
3. Search for the estimate you wish to import by using the Estimate ID, Estimate Name, Created By, Created Date, Last Modified, and Status fields.
4. Click **Search**. The search results display.
5. Select the radio button associated with the desired estimate.

Import Estimate

Import Estimate will import Part Number, Quantity and Duration for items from the original Estimate.

Start by searching for an estimate you would like to copy.

Order Page: Items Tab – Imported Estimate

6.2.3.2 Uploading a BOM

To upload a BOM, complete the following steps:

- From the Order page: Items tab, click to expand the More Actions drop-down menu and then click Import a Saved Configuration. The Import Saved Configuration dialog box displays. Click **Select** next to BOM Upload.
- Click **Browse** and locate the appropriate file.

Best Practice: Use the available templates in XLS/XLSX format to upload a BOM. The template links are available in the Import Saved Configuration dialog box.

- Click **Upload File**. The Items sub-tab displays the imported BOM as line items.

The screenshot shows the Order Page interface. At the top, there are navigation links: Favorites, Export, Print, Email, Share, Delete, and More. Below that, the Order details are shown: ORDER NAME: test, PURCHASE ORDER #: 66560575, WEB ORDER ID: 66560575, STATUS: UNSUBMITTED, and SMART ACCOUNT: Assign Smart Account. Below these details, there are tabs: Items (selected), Discounts, Shipping and Install, Billing, and Review and Submit. Under the Items tab, there is a section for 'Upload BOM File' with a note: 'Only part number and quantity are uploaded from Excel BOM files.' A 'File' input field and a 'Browse' button are provided. At the bottom right of this section are 'Cancel', 'Clear', and 'Upload' buttons.

Importing a BOM

- To continue adding lines, click **Save**. The page remains unchanged, and additional lines can be added by repeating the above process or by using any of the other processes for adding products.
- Alternatively, to continue with the deal, click **Save and Continue**. The Discounts & Credits sub-tab displays.

6.3 Adding Different Types of SKUs

You can add different type of products, services, and configurations to the order on the Order Page: Items tab before moving to the Discounts tab.

6.3.1 Adding Remanufactured Equipment

You can add remanufactured equipment (also known as Refresh), to a quote and/or an order with the applicable services.

- Add remanufactured products using any of the methods for adding items. See [Adding Items to the Order](#).

Note: Some remanufactured products require a power cord. For those products, you must select the correct power cord for your country prior to submitting your order.

- To select or change options for the remanufactured product, see [Choosing Options and Resolving Issues](#).

3. Hover over the **REFRESH** icon to view the new equivalent product SKU and price. The icon will display only for the remanufactured product.
4. To view available inventory and shipment lead times in the Items tab in Order, click [Remanufactured Availability](#). The Remanufactured Inventory dialog box displays.
5. Click **Cancel** to return to the Items tab.

The screenshot shows the 'Items' tab of the Cisco Order User Guide. At the top, there are tabs for 'Items', 'Discounts', 'Shipping and Install', 'Billing', and 'Review and Submit'. Below the tabs, there's a search bar and a 'Find Products and Solutions' dropdown. The main area lists line items. Item 1.0 CISCO2911 has a 'New Equivalent' dialog open, which includes the SKU CP-6911-W-K9= and a price of \$220.00. A 'REFRESH' button is visible in this dialog. To the right of the list, there's a 'Remanufactured Availability' section with a link that is also highlighted with a red box and a red circle labeled '4'. At the bottom of the screen, there are buttons for 'Check Local Validations', 'Save', and 'Save and Continue'.

Orders Tab: Items Tab – Remanufactured Product

Note: Place new items and remanufactured items in different shipping groups. See [Managing Shipping Groups](#) for more information.

Hardware	Qty on Order	Availability	Lead Time		
			3 Days	7 Days	30 + Days
2.0 CP-6911-W-K9-WS	10	0	0	0	0
Ship-To: CANADA					
3.0 CISCO2911-SECK9-RF	4	46	46	0	0
Ship-To: CANADA					

Remanufactured Inventory Dialog Box

6.3.2 Adding Fixed Scope Consultancy SKUs

You can quote and order Fixed Scope Consultancy services only in Cisco Commerce. There are two types of Fixed Scope Consultancy services:

- Installations
- Network Optimization

These services are fixed price, fixed scope, and fixed duration. Therefore, Fixed Scope Consultancy services will always be purchased at net price. To add technical services see [Adding Services](#).

Fixed Scope Consultancy SKUs can be added as a separate line, or configured as an option for eligible software offers (see [Choosing Options and Resolving Issues](#)).

To add Fixed Scope Consultancy SKUs, complete the following steps:

1. From the Order page: Items tab, click the Add Product Item field and enter “ASF-“. A list of Fixed Scope Consultancy SKUs display.
2. Select the desired SKU.

Best Practice: Contact information for Fixed Scope Consultancy SKUs must be accurate and should be the contact with whom a project team will work to schedule the installation. In most cases, this is not the Ship To contact.

Providing accurate information at the time of order results in seamless delivery.

Order Page: Items Tab – Fixed Scope Consultancy SKU

3. Verify the quantity is correct depending on the SKU and click **Add**. The Fixed Scope Consultancy line is added to the line items of the order.
4. Before completing the order, you must verify the contact information and move these items to a new shipping group if necessary. See [Managing Shipping Groups](#).

6.3.3 Adding a License SKU

SKUs that begin with L or LIC and end with = are license SKUs. Cisco Commerce offers two software/license delivery methods: electronic delivery (e-delivery) and physical delivery.

For example:

- License SKUs with e-delivery begin with the letter “L”, example: L-3PTY-DL-100K= If you choose an L SKU, the license is sent electronically regardless of the indicated delivery method.
- License SKUs with physical delivery begin with the letters “LIC”, example: LIC-3PTY-DL-100K= If you choose an LIC SKU, which is physical delivery, the system looks to the delivery option indicated. If e-delivery is the indicated delivery method, then the system overrides the LIC SKU and delivers the license electronically.

Note: Add a license following the same directions as adding any other items.

Pay attention to choosing the SKUs and indicating the appropriate delivery method.

To change the delivery method of a license SKU, see [Changing the Delivery Method of a License SKU](#).

The same rules that govern software license delivery are applicable for e-software delivery. For electronic delivery, you must provide a shipping email address or an end customer email address.

6.3.3.1 Changing the Delivery Method of a License SKU

To manage the delivery method for license SKUs, complete the following steps:

1. For licenses that are slated for physical delivery, choose a preferred carrier on the Shipping and Install tab, (only if applicable for the particular order). To set shipping information, see [Setting the Shipping and Installation Information](#).
2. Click Edit corresponding to the Delivery Method column. The Change Line Shipping Options dialog box displays.

Line Items				
	Qty	Delivery Method	End Customer Email	Lead Time
<input type="checkbox"/> 1.0 CISCO2911/K9	4	PHYSICAL		21 days
<input type="checkbox"/> 2.0 CP-6911-W-K9-WS	10	PHYSICAL		Not Applicable
<input type="checkbox"/> 3.0 ASF-ASOSS-EPN-DEP	1	PHYSICAL		Not Applicable
<input type="checkbox"/> 4.0 LIC-MX64W-ENT-5YR	10	PHYSICAL		3 days
<input type="checkbox"/> 5.0 L-CSMST25-U-4.0-K9	1	ELECTRONIC 2	3	2 days

Order Page: Shipping and Install Tab -Edit Delivery Method

3. If the line item is scheduled for e-delivery only, complete the following steps:
 - Enter the shipping/end customer email and any customer reference information. Separate multiple email addresses with commas.
 - To make all line items eligible for electronic delivery, check the Apply to Group checkbox in the Change Line Shipping Options dialog box.
 - To update the delivery method, click **Update**.

- Alternatively, you can also update this information in the line items list next to the corresponding item.

Change Line Shipping Options

Delivery Options

Customer Reference (i)

Apply to Group (i)

Cancel **Clear Form** **Update**

Change Line Shipping Options

- If the line item is scheduled for physical delivery only, complete the following steps:
 - If applicable, choose the appropriate preferred carrier on the Shipping and Install tab.
 - To make all line items eligible for physical delivery, check the Apply to Group checkbox in the Change Line Shipping Options dialog box.
 - To update the delivery method, click **Update**.
- If a chosen line item is eligible for e-delivery or physical delivery, the option to change the service level from either e-delivery or physical delivery is available.
 - Click the radio button (either Electronic or Physical) corresponding to the appropriate option and add the necessary email and customer reference information.
 - To update the delivery method, click **Update**.

6.3.3.2 Changing From Physical to Electronic Delivery without Changing the Discount

To change a license or software delivery from physical to electronic delivery without changing the discount, complete the following steps:

- Begin with an open order that already contains an LIC-...= SKU.
- On the Order page, Items tab, click the Add Product Item field and enter the same SKU, except beginning with L, as opposed to LIC. The drop-down menu displays matching options after you enter a few characters.
- Click the appropriate SKU from the Add Product Item drop-down menu. See [Adding Items by SKU](#).
- Click **Add**. The e-delivery item is added as a line item to the configuration.

Items Tab - License SKUs

P.O. Line Reference	Lead Time	Unit List Price (USD)	Qty	Ext. List Price (USD)
1.0 L-LIC-CT4500-UPG	2 days	253.00	100	25,300.00
2.0 LIC-CT4500-UPG	14 days	226.00	100	22,600.00

Order Page: Items Tab – License SKUs

5. Scroll through the line items to locate the original LIC...= SKU. Once located, check the checkbox of the license that is set for physical delivery.
6. Click **Remove Selected Lines**. The Remove Items from Order dialog box displays.
7. Click **Remove Items**. This permanently removes the physical delivery item from the order.
8. Click the Discounts tab.
9. Review the discounts. The electronic delivery item has been added and the physical delivery removed, and the discounting remains the same.

See [Reviewing Discounts](#) for more information on discounts in Cisco Commerce Orders.

6.3.4 Adding a Spare

You can add multiple spares to the order by uploading an Excel spreadsheet (see [Adding Multiple Spares via Excel](#)). Alternatively, you can add spares individually by entering the appropriate SKU (see [Adding Individual Spares](#)).

Spares have an = sign at the end of their SKU.

6.3.4.1 Adding Multiple Spares via Excel

The Cisco Commerce Orders tab enables you to add multiple line items by uploading an Excel spreadsheet containing product numbers, quantities, and durations. Each line on the Excel file is added as a major line on the order and therefore the system is not able to identify which items would be a minor line of a different item. No validation is performed on uploaded items.

Note: Add a license following the same directions as adding any other items.

Pay attention to choosing the SKUs and indicating the appropriate delivery method. To change the delivery method of a license SKU, see [Changing the Delivery Method of a License SKU](#).

To add multiple spares by uploading an Excel spreadsheet, complete the following steps:

- From the Order page: Items tab, click to expand the More Actions drop-down menu, then click [Import a Saved Configuration](#). The Import Saved Configuration dialog box displays.

Select [BOM Upload](#)

Upload a BOM file or download a template in the following formats: **XLS/XLSX** 4

Not recommended for assembled configurations. Validation will not maintain Major/Minor line relations.
(All lines will carry over as Major lines)

Import a Saved Configuration Dialog Box: BOM upload View

- Click **Select** next to BOM Upload. The Order page: Items tab refreshes with an Upload BOM File section.
- Click **Browse**.
- Locate the appropriate file and click **Open**.

The template for use with this function is located on the Import Saved Configuration dialog box. Click XLS or XLSX in the text to the right of BOM Upload.

- Click **Upload**.

Items	Discounts	Shipping and Install	Billing	Review and Submit
Upload BOM File Only part number and quantity are uploaded from Excel BOM files. File <input type="file"/> Browse 5 Cancel Clear Upload				

Order Page: Upload BOM File Section

6.3.4.2 Adding Individual Spares

To add a spare one at a time, complete the following steps:

- From the Order page: Items tab, click the Add Product Item field and begin entering the SKU or partial SKU. For more information on entering by SKU, see [Adding Items by SKU](#).
- Click the appropriate SKU from the Add Product Item drop-down list.
- Click the Qty field and enter the desired quantity.

The screenshot shows the 'Items' tab of the Order Page. A search bar at the top contains 'cisco'. Below it is a table with columns: Part Number, Description, Product Family, and List Price. The first row shows 'CISCO7606-S=' with 'Cisco 7606-S Chassis' in the description and 'Cisco 7600 Series Router' in the product family. The list price is 6000.0. The second row shows 'CISCO15454' with '15454 ATO (Assemble to Order)' in the description and 'ONS 15454' in the product family. The list price is 0.0. The third row shows 'CISCO7613-S' with 'Cisco 7613-S Chassis' in the description and 'Cisco 7600 Series Router' in the product family. The list price is 0.0. To the right of the table, there are buttons for 'Check Local Validations', 'Save', and 'Save and Continue >'. A dropdown menu is open, showing 'By Show All Items'.

Order Page: Items Tab – Adding a Spare

- Click **Add**. The spare is successfully added to the line items.

6.4 Choosing Options and Resolving Issues

When a product requires additional configuration, select the appropriate options and resolve any issues so that the product is properly configured. Select Options is active under products that require additional configuration.

The screenshot shows a line item for 'CISCO2911/K9 CP'. The description includes 'Cisco 2911 w/3 GE,4 EHWIC,2 DSP,1 SM,256MB CF,512MB DRAM,IPB ECCN 5A002.A.1'. A warning icon (exclamation mark) is shown next to the part number. A red circle with the number '1' is overlaid on the 'Select Options' button. A tooltip message 'Invalid as of 29-Feb-2016 04:23 EST' is displayed above the button. Other buttons visible include 'Select Service', 'Validate', 'Add Note', and 'More Actions'.

Order Page: Items Tab

Note: Edit Options displays for products already configured. However, you can select new options.

To select options, configure products, and resolve any warnings or errors in the configuration, complete the following steps:

- From the Order page: Items tab, click Select Options below the line item that needs to be configured so it can become valid. The Option Selection page displays.

The configuration can be completed for multiple options, individual options, when the SKUs are known, and when the SKUs are not known.

- If the SKUs for the required items are known, use the multiple option search function to enter the SKUs in a list and have all results display on the page (see [Searching for Multiple Known SKUs](#)).
- To search for a known SKU one at a time, use the Option Search tab or search for a SKU manually through the system of links and messages (see [Searching for a Single Known SKU](#)).

- If the SKUs are not known or to search by each required component, use the individual search function (see [Searching Unknown SKUs Individually](#)).
2. Review the product list displaying on the left of the page in the Configuration Summary pane.
 3. Attend to the warning or error messages displaying at the top of the page indicating corrections within the configuration. You cannot submit the order without completing the configuration.
 4. Some of the options have icons next to them. These icons give additional information about the corresponding option. Hover over the icon to view related information.
 5. Click the Key drop-down to view icon-related information.

6.4.1 Using the Power Calculator

Power Calculator option is only applicable to UCS products and identifies the electrical power consumption of products to make better selection.

To view the power consumption information for a UCS product, complete the following steps:

1. Select the appropriate option and click Power Calculator drop-down arrow to view the consumption.

2. A legal disclaimer displays. Click **Accept** to view the power consumption details.
3. Click Metric or Imperial to view appropriate units in the power calculator drop-down menu.
4. Click again on Power Calculator to close the drop-down menu.

6.4.2 Searching for Multiple Known SKUs

Cisco Commerce
> Orders Tab

Create Order >
Items Tab

Populate Order >
Select Options

Option Selection
Page (Next Gen
Configuration)

To search for multiple known option SKUs at a time, complete the following steps:

1. From the Option Selection page, click Multiple Options Search. The content on the right of the page refreshes and displays the Multiple Options Search section. Click Show Instructions for support and examples.
2. Click the text box and enter SKUs and respective quantities. Copy and paste information from another source or enter the information manually if needed.

Note: Enter the SKU and respective quantity; separated by a space, a comma, a tab, or a semi-colon on the same line, one SKU per line.

Enter the product items in a column. Do not enter the product items in a list separated by commas.

The screenshot shows the 'OPTION SELECTION' screen for model 'CISCO2911/K9'. At the top right, it says 'Global Price List - US (USD)'. On the left, there's a 'Configuration Summary' section with a 'View Full Summary' link. Below it is a 'Country Specification' section with a dropdown menu set to 'Select Country (Not Required)'. A yellow warning box titled 'Warnings (3)' lists three items: 'The quantity of Power Cables must be equal to the quantity of Primary Power Supply selected. Please adjust the quantity. (CE200050)', 'Have you considered using Cisco ONE http://www.cisco.com/go/one for this order? The Cisco ONE equivalent for the current bid is not currently available.', and 'The current bid for the selected configuration is \$0.00'. To the right of the country dropdown is a 'Multiple Options Search' tab with a red circle containing the number '2' over it. The search interface includes a 'Search by SKU' input field, a 'Show Instructions' dropdown, a 'Clear' button, and a 'Search' button. Below the search area is a table titled 'Multiple Option Search Results' with columns for 'SKU', 'Lead Time', and 'Unit List Price (USD)'. The table has a header row with filters for 'Filter By: ALL' and 'Key'. At the bottom of the search results table, it says 'Result By: Available Location'.

Option Selection Page: Multiple Options Search

3. Click **Search**.
4. The search results display at the bottom under Result: By Available Location, Result: By Potential Location, and Result: Not available. Search results include estimates lead times, SKU list prices, and locations (available and potential). Some of the results have icons next to them. These icons give additional information about the corresponding option. Mouse over the icon to view the information.
5. From the search results under Available Location section, check the checkbox(es) corresponding to the desired items.
6. Errors with the indicated quantities display above the Multiple Options Search tab. Click each link to resolve the error. Once the quantity errors are resolved, the items are added to the configuration.

Note: Some Qty fields are editable and some are not. If the Qty field is populated and greyed out so that you cannot make edits, the quantity is controlled by the system according to the rules of quantity limitations.

The screenshot shows the 'OPTION SELECTION N20-C6508' page. On the left, there's a 'Configuration Summary' section with a 'Country Specification' dropdown set to 'Select Country (Not Required)'. Below it are sections for 'BLADE OPTIONS' (with 'Blade' expanded), 'CHASSIS OPTIONS' (with 'Fabric Extender' and 'Power' expanded), and a summary table for 'Subtotal' (1.00) and 'Estimated Lead Time' (10 days). On the right, a 'Warnings (4):' box lists errors related to N20-C6508 configurations. A 'Multiple Options Search' section contains a search bar for 'UCSB-B420-M4' and a table for 'Option Search Results' showing 'UCSB-B420-M4' with a lead time of 21 days and a unit list price of \$9,187.00. Two red circles are overlaid on the page: circle 8 highlights the 'Available Location' link in the search results table, and circle 9 highlights the 'Potential Location' link in the same table.

Multiple Option Search Tab: Search Results

7. Click **Done**. The Order page displays.
8. Available Location indicates the path to the SKU(s) under the Configuration Summary pane on the left side of the page. Items can be added to the configuration by leaving the appropriate checkbox(es) checked. To remove a product from the list of items to add, uncheck the checkbox corresponding to that product.
9. The Potential Location indicates a possible path to the indicated SKU(s) under the Configuration Summary pane on the left side of the page. Items cannot be added to the configuration from this section. Click the link within the indicated path and select the appropriate product.
10. If there are any error messages associated with a SKU, the error message displays at the top of the page and the SKU displays under Results: Not available. These SKUs are not selectable.
11. Hover over the information icon to learn more about available and potential locations.

The screenshot shows a 'Warnings (3):' box with one item: 'The quantity of Power Cables must be equal to the quantity of Primary Power Supply selected. Please adjust the quantity. (CE200050)'.

Option Selection Page: Quantity Error Messages

6.4.3 Searching for a Single Known SKU

To search for a single known SKU, complete the following steps:

1. From the Option Selection page, expand the Option Search section.
2. Click the Option SKU field and enter the SKU.

The screenshot shows the 'OPTION SELECTION CISCO2911/K9' page. On the left, there's a 'Configuration Summary' section with tabs for 'Country Specification' (selected), 'Category' (DRAM Options), 'Qty' (1), and 'Unit List Price (USD)' (\$850.00). Below this are sections for 'Compact Flash Options', 'USB Options', and 'MODULES' (with sub-options like Blade Servers, Service Modules, and Internal Service Module). At the bottom are 'Subtotal' (\$2,695.00) and 'Estimated Lead Time' (14 days). Buttons for 'Reset Configuration', 'Cancel', and 'Done' are at the bottom right.

Warnings (3):

- The quantity of Power Cables must be equal to the quantity of Primary Power Supply selected. Please adjust the quantity. (CE200050)
- Have you considered using Cisco ONE <http://www.cisco.com/go/one> for this order? The Cisco ONE equivalent for this configuration is not currently available.

Option Search: (2)

Option Search Results:

SKU	Lead Time	Unit List Price (USD)
MEMUSB-1024FT	21 days	\$850.00

Result By: Available Location:

SKU	SKU Location	Qty
MEMUSB-1024FT	USB Options > MEMUSB-1024FT	1

Result By: Potential Location:

SKU	SKU Hierarchy
-----	---------------

Option Selection Page: Option Search Tab

- Enter the SKU and a drop-down menu displays all the available options based on what was entered. Select the desired SKU from the drop-down list.

Once the correct SKU has been entered into the field, click **Search**. The Option Search tab displays and the Option SKU field is automatically populated.

- Click **Search**. The search results display at the bottom of the page under Result: By Available Location, Result: By Potential Location, and Result: Not available. Search results include estimates lead times, SKU list prices, and locations (available and potential).

Some of the results have icons next to them. These icons give additional information about the corresponding option. Hover over the icon to view the information.

- Click the radio button corresponding to the SKU.
- Click **Add**.

6.4.4 Searching Unknown SKUs Individually

To select options, configure products, and resolve any warnings or errors in the configuration without knowing the SKUs needed, complete the following steps:

- From the Order page: Items tab, click Select Options below the line item. The Option Selection page displays.

Options that require additional configuration have an orange icon next to them and are identified at the top of page above the Option Search section.

The screenshot shows the 'OPTION SELECTION WS-C4948E-E' page. At the top right, there is a red circle with the number '1'. In the center, a yellow warning box contains the text: 'Warning (1): WS-C4948E-E quantity 1 requires a minimum quantity of 1 from Power Cable (CE100012)'. Below the warning, there is an 'Option Search' section with a search bar and a dropdown menu labeled 'Multiple Options Search'. The search results table shows one item: 'WS-C4948E-E > Accessory kit' under 'Accessory kit'. The table has columns for 'SKU', 'Qty', 'Lead Time', and 'Unit List Price (USD)'. One row is listed: 'CAB.CON.C4K.RJ45' with 'Qty' set to 1, 'Lead Time' at 21 days, and 'Unit List Price' at 0.00. There are also 'Clear Selection' and 'Show Incompatible SKUs' links.

Option Selection Page

2. Scroll through the Configuration Summary pane. Using the warning messages at the top of the page as a guide, click the appropriate link within the message to resolve each warning or error. Click the appropriate option(s). Continue this process until all issues have been.

The screenshot shows the 'Configuration Summary' page. A red circle with the number '3' is placed over the 'Country Specification' dropdown menu. The dropdown menu is open, showing a list of countries: ALBANIA, ANDORRA, ANGOLA, ARGENTINA, ARMENIA, ARUBA, and AUSTRALIA.

Option Selection Page: Country Specification Feature

3. Click the Country Specification drop-down arrow in the Configuration Summary pane and click the appropriate country. The system will then filter the products based on the country selection, making it easier and faster to configure products correctly.
4. Click **Done**. If issues remain, an error message displays in the Done Messages dialog box. Upon clicking Done in the Done Messages dialog box, the Items tab displays a confirmation message indicating that the changes have been saved.
5. To correct the error(s), click the Return to Configuration button or link.

Done Messages Dialog Box

6.4.5 Viewing Full Summary

You have the option of viewing a summary page of the configuration with the selected options.

From the Option Selection page, click [View Full Summary](#). The page refreshes to display the Full Configuration Summary.

6.4.6 Using Cisco Feature Navigator

Cisco Commerce > Orders Tab

Create Order > Items Tab

Populate Order > Select Options

Option Selection Page (Next Gen Configuration)

The Cisco Feature Navigator helps you to find the best software solution for the selected hardware. By using this function, you can find the right product based on software or feature needs.

To access Cisco Feature Navigator, complete the following steps:

- From the Option Selection page, click [Cisco Feature Navigator](#).

The Cisco Feature Navigator page displays in a new window.

The screenshot shows the 'Option Selection' page for 'UCSB-5108-DC'. At the top, there's a 'Configuration Summary' section with a 'View Full Summary' link. Below it are two search buttons: 'Option Search' and 'Multiple Options Search', with a search input field. To the right, a yellow box contains three warning messages: 'N20-C6508 cannot be configured outside the Bundle. Please use N20-C6508-UPG instead. (CE200137)', 'UCSB-5108-DC requires a minimum of 2 and allows maximum of 4 from Power. (CE100015)', and 'Configuration is required. Please check the Configuration Summary window and configure the item(s) with warning icon image to the right.' A red box highlights the 'Cisco Feature Navigator' link in the top right corner of the page header.

Option Selection Page: Cisco Feature Navigator

- To return to Cisco Commerce, close the new window.

There is no navigation back to Cisco Commerce from the Cisco Feature Navigator page.

The screenshot shows the main interface of the Cisco Feature Navigator. At the top left is a navigation bar with 'Products & Services', 'Cisco Feature Navigator' (which is highlighted), and other links like 'HOME', 'PRODUCTS & SERVICES', 'TOOL INDEX'. The main area features a large image of a man in a suit. Below it is a welcome message: 'Welcome to Cisco Feature Navigator. Cisco Feature Navigator allows you to quickly find the right Cisco IOS, IOS XE, IOS XR, NX-OS and CatOS software release for the features you want to run on your network.' To the right is a 'Help' section with links to 'Related Tools' (MIB Locator, Download Software, Cisco Unified Communications, Compatibility Tool) and a 'Extend Security, Voice, & Wireless' box. At the bottom, there are four main navigation buttons: 'Research Features' (Search by Feature/Technology), 'Research Software' (Search by Software/Platform/ ProductCode/Image), 'Compare Two Software Releases' (Compare Images), and 'View End of Life Info for Images' (View Eol. for Images). A note at the bottom states: 'By using this tool, you agree to all of Cisco System's [terms and conditions](#) for this tool.'

Cisco Feature Navigator Page

6.5 Setting Quantities for Products

You can add quantities of products when adding them to the Items tab or when they are already added to the Items tab.

Note: The Qty field in Cisco Commerce Orders tab accommodates up to ten digits, for example, 1234567891.

To change the quantity for each of the products, enter the desired number of products or options in the Qty field for that line and press **Enter**. For multiple products and options, repeat this step for each item. The extended list price is the price per unit multiplied by the quantity.

The screenshot shows a product line item in the Cisco Commerce Order interface. The product is 'L-LIC-CT4500-UPG'. The 'Qty' field is highlighted with a red border and contains the value '100'. Other visible fields include 'Upg license SKU for Cisco 4500 Wireless Controller (e-deliv)', '2 days', '252.85', and '25,285.00'. Below the line item, there is a note about the validity date ('Valid as of 29-Feb-2016 04:06 EST') and several action buttons ('Edit options', 'Change Service/Subscription', 'Validate', 'Add Note', 'More Actions').

Order Page: Items Tab – Qty Field

6.6 Adding Services

There are various types of Cisco service offerings:

Technical services are always attached to hardware or software product. They can either be ordered at the point of sales (in Cisco Commerce) or purchased separately as a service only line (either in Cisco Commerce or CSCC).

Note: Standard durations for technical services can be between 12 and 60 months. However, multi-year discounts for standard orders are not available for service durations greater than 36 months.

Advanced Services (AS): Each type of Advanced Service has different deliverables, delivery model, as well as ordering rules. Not all are orderable within Cisco Commerce.

- AS Transaction (AS-T): These cannot be ordered within Cisco Commerce, you must fax this order.
- AS Subscription (AS-S): These cannot be ordered within Cisco Commerce, you must use CSCC to quote and order.
- AS-Fixed (AS-F): These services have a fixed scope, fixed price, and fixed cost and are orderable with Cisco Commerce. For more information on ordering ASF SKUs in Cisco Commerce Orders tab, see [Adding Fixed Scope Consultancy SKUs](#).

You can add services to items as part of the product ordering process. Services for previously ordered products can also be ordered separately as a service-only order. See [Creating Service Only Orders](#).

Best Practices: Add services as part of the product configuration within your quote or order, rather than as a separate service-only line item. To create an order for service-only line items, see [Creating Service Only Orders](#).

For more information on Cisco services, you can reference:

<http://www.cisco.com/web/partners/services/index.html>

For more information on CSCC, see:

<http://www.cisco.com/web/services/resources/cscc/training/index.html>

6.6.1 Setting Default Services Options

Within your Cisco Commerce My Profile and Preference section, you can select your default service choices, as well as determine whether you would like Cisco Commerce to automatically add services to your valid configurations across all quotes, estimates, and orders in Cisco Commerce (refer to the [Getting Started with Cisco Commerce User Guide](#)). You can also override these preferences at the quote, estimate, or order level.

If you ask Cisco Commerce to automatically add services to your order, they will be chosen based on the following:

- Services will be attached based on the service preferences set within the order
- If no services are set within the order, then preferences from your My Profile and Preferences will be used
- If selected preferences are not applicable (or not set), the system attaches services based on existing service attach rules, such as, products being ordered, service program availability, certifications, Bill-to and install site and others

To set the service options in the items sub-tab (these will override any preferences that were set under your My Profile and Preferences), complete the following steps:

1. In the Service Preferences window, your Default Service Preference appear. You can also Search for the Service Level, select a service level, and your selection will be automatically saved for this quote.
2. Click the appropriate radio button to allow Cisco to attach services automatically or to add services manually. See [Error! Reference source not found.](#).
3. Start typing in the **Select/Edit Service Level** box and a list of matching Services will appear; select the desired Service Level

The screenshot shows the 'Deals & Quotes' tab selected in the top navigation bar. The main area displays a quote with the name 'QUOTE NAME SWC_ServicAttach'. It includes fields for DEAL ID (25777158), QUOTE NUMBER (4715764041), QUOTE STATUS (NOT SUBMITTED), EXPIRY DATE (N/A), and SMART ACCOUNT ASSIGNMENT (Assign Smart Account). Below this, there are tabs for Deal, Quote, Review and Submit, and Order. Under the Quote tab, there are sub-tabs for Items, Discounts and Credits, Install/Service Location, and Billing. Buttons for Save and Save and Continue are present. A sidebar on the left shows options like Service Preferences, Select/Edit Service Level, and View. The 'Service Preferences' section is highlighted with a red box and has a red number '3' pointing to it. The 'Select/Edit Service Level' section is also highlighted with a red box and has a red number '2' pointing to it.

6.6.2 Adding Services to Items in the Configuration

There are two ways to edit services using the Services Option widget. You can attach services at the Header level by clicking on **Edit Service** in the More dropdown on your order. The Service Level you select will apply to all selected lines of your configuration. Use this option for basic Service Level changes. You can also click **Edit/Remove Service** on an individual line of your configuration. Use this option for more complex Service Level changes.

The screenshot shows a configuration cart with two items. The first item is 'UCSB-B200' with a checkmark, and the second is 'UCSB-5108-AC2=' without a checkmark. Both items have their respective 'Edit Options' buttons highlighted with red boxes. The 'Edit Services' button in the context menu is also highlighted with a red box.

	Lead Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)
1.0 UCSB-B200 more ↗ UCS B200 M U, mem, HD	28 days	9,291.00	1	9,291.00	0.00	9,291.00
2.0 UCSB-5108-AC2= more ↗ UCS 5108 Blade Server AC2 Chassis s/0 PSU/8 fans/0 FEX	21 days	29,825.00	1	29,825.00	0.00	29,825.00

You can attach Services at the Header level if you wish to apply the service level across all selected lines of the configuration in the cart. However, because preferences in the cart are not filtered by Product lines, the Service level may or may not successfully apply to each line. You should verify that each line of your configuration has the correct Service level applied before proceeding with your order.

1. Place a checkmark next to the desired SKUs before selecting **Edit Services** from the More dropdown.
2. **Select/Edit Service Level**

3. Start typing the name of the Service; the widget will display a list of potentially-matching Service Levels.

4. Notice the Compatible Service Lines display after selecting a service.

5. Change the duration by entering in number of months, start date, or start and end date.
6. Apply the Service to the Selected Lines (see Note below):

Note: applying the Service to the selected lines does not guarantee that the Service will be added to each line; you should manually verify each individual configuration to ensure it has the correct service level.

6.6.2.1 Attach Services on the Edit Services/Subscription Page

The Edit Services/Subscription page summarizes all attached services and subscriptions. You can use this page to compare prices for different service offerings, see what services are available, or add secondary services. You can also attach one or more service levels to one or more lines of your configuration.

1. Click either **Edit Service/Subscription** or **Select Service/Subscription** on any line to open the Edit Services page.

Search by Sku , Description and Product Family		1	Add	Find Products & Solutions Actions ▾

6.6.2.2 Attach Services to Unassigned Products

Products that don't have services attached are listed under **Unassigned**.

1. To add services, click on **Add a Service SKU**.
2. Select the service you want to attach.
3. Click **Apply**.

The screenshot shows the Cisco Order Management interface. On the left, there's a sidebar with navigation links like 'Home', 'Search', 'New Order', 'My Orders', 'Cart', and 'Logout'. The main area has tabs for 'Unassigned', 'Assigned', and 'Completed'. The 'Unassigned' tab is selected, showing a table of products with no attached services. One row is highlighted: 'CISCO SOFTWARE SUPPORT SERVICE - S...' with a summary of 'ECMU (SWSS UPGRADES)' from 'CON-ECMU-C1F1S19K'. The 'Start Date' is 30-Jul-2017, 'End Date' is 29-Jul-2018, and 'Duration' is 12 Months. The total list price is 192.00. Below this row, there are buttons for 'Change Service' and 'Remove Service'. A red box highlights the 'Unassigned' tab. A red circle with the number '1' is over the 'Add a Service SKU' button. A red box highlights the 'Add Service' dialog box. The dialog box has a note: 'Note: These are available choices in program and if you like to review/choose a service level from a different program - then please click this link [Service Options](#) and navigate to desired program.' It lists several service options, with 'SNTC 8X5XNBD (SNT)' selected (marked with a red box and number '2'). Other options include 'CMB SPT SVC 24X7X4OS (NCH4P)', 'CMB SPT SVC 24X7X2OS (NCH2P)', 'CMB SPT SVC 24X7X2 (NCH2)', and 'CMB SVC 24X7X2OS (NCF2P)'. At the bottom of the dialog are 'Cancel' and 'Apply' buttons, with 'Apply' highlighted with a red box and number '3'.

4. The product is moved off the **Unassigned** tab and is displayed with its attached Service Program, Duration, and Service SKU.

The screenshot shows the same interface after applying the service. The 'Unassigned' tab is no longer visible. The main area now displays the assigned product: 'SMART NET TOTAL CARE (1 ITEM)' with a summary of 'SNT (SNTC 8X5XNBD)'. The 'Start Date' is 30-Jul-2017, 'End Date' is 29-Jul-2018, and 'Duration' is 12 Months. The total list price is 22.33. Below this row, there are buttons for 'Change Service' and 'Remove Service'. A red box highlights the 'Assigned' tab.

5. If the service selected can't be attached, a message will appear with instructions.

The screenshot shows the 'Edit Services/Subscriptions' page for 'C1-CISCO1921/K9'. The top bar says 'EDIT SERVICES/SUBSCRIPTIONS C1-CISCO1921/K9 (USD)'. A yellow warning message in a box states: 'Service preferences cannot be applied to C1-CISCO1921/K9 configuration. System will restore any existing services on configuration. Please use Select/Change Services link to see available services. (CS410)'.

6.6.2.3 Adding Secondary Services in the Edit Services/Subscriptions Page

1. When available, click on **Additional Services** to show available secondary services
2. Select the appropriate service and duration.
3. Click **Apply**.

Service SKU	Product SKU	Unit List Price (USD)	Qty	Total List Price (USD)

6.6.2.4 Changing Services in the Edit Services/Subscriptions Page

There are three different levels where you can make changes to your Service. It is important to understand how your selections will affect your configuration. The following are three different configuration level changes available and how they affect the entire configuration.

1. Header Level Changes
2. Group Level Changes
3. Line Level changes

Service Options

1 Choose Service Level from All Service Programs ▾ Switch to Legacy Service P...

Search by Name & Description

Note: Cisco may still install another compatible service if required. Compatible services are the services that come with primary service and are based on products.

		Services		7,078.00
			Cancel Done	

4. The system directs you to the top to search for an appropriate Service Program. Search and select the appropriate Program and click **Apply**.

The screenshot shows the 'Service Options' section of the Cisco Order User Guide. On the left, there's a dropdown menu titled 'Choose Service Level from NETWORK SUPPORT COMB...' which is currently expanded, showing several service level options like 'SMART NET TOTAL CARE 3 YEAR SUPPORT' (3 variations), 'SOLUTION SUPPORT WITH SNTC' (8 variations), 'SP BASE SERVICES' (10 variations), and 'NETWORK SUPPORT COMBINED SERVICES' (32 variations). To the right of the dropdown, there are sections for 'Time Duration' and 'Duration'. The 'Duration' section has a field set to 'Months: 1 to 60'. At the bottom right of the screen, there are 'Reset' and 'Apply' buttons, with a red circle containing the number 4 positioned above the 'Apply' button.

5. The system will automatically adjust all necessary Service programs in other Minor Product Lines as necessary.
Note: This will not affect Unassigned Products eligible for service.
6. Once all changes are complete, Click **Done**.
For **Header** level changes, refer to section 2.1. **Note:** Header Level changes will affect Unassigned Product lines eligible for service.

6.6.2.5 Add/Edit a Corresponding Subscription

Note: Only Product SKUs that have Subscriptions associated with them will have the option of adjusting subscription licenses and durations. Otherwise, the Subscriptions Tab will not appear in the Edit Services/Subscriptions Page.

1. Click **Edit Subscription** to change the details of the subscription.

The screenshot shows the 'EDIT SERVICES/SUBSCRIPTIONS' page for product SKU 'ESA-ESI-LIC=' in the 'Global Price List US Availability (USD)' tab. The top navigation bar includes 'Key' and 'View 100-199 Users'. Below the navigation, there are sections for 'Subscription Options' (License Count: 100, View 100-199 Users, Update, Term: 3YR) and 'Subscription SKU' (Product SKU: 'ESA-ESI-LIC='). The main table lists a single item: 'ESA INBOUND BUN LIC (1 Item) ESESI (SUBSCRIPTION-CONTENT)'. It shows 'Duration: 36 Months', 'License Band: 100-199 Users', and 'Term: 3YR'. The row contains a 'Edit Subscription' link (highlighted with a red box and circled with a red number 1) and a 'Remove Subscription' link. To the right of the table, there's a 'Configuration Summary' section showing a total price of \$4,193.00 for a 'Subscription'. At the bottom right are 'Cancel' and 'Done' buttons.

2. You can edit the Start Date and duration of the subscriptions.

Subscription SKU	Product SKU	Qty	Unit List Price USD	Total List Price USD
ESA INBOUND BUN LIC (1 Item) ESESI (SUBSCRIPTION-CONTENT)				
GROUP DESCRIPTION SUMMARY				
Duration 36 Months License Band 100-199 Users Term 3YR

Edit Subscription Remove Subscription				
2 <input type="radio"/> ESA-ESI-1Y-S1 Inbound Essentials Bundle(AS+AV+OF) 1YR Lic, 100-1...	<input type="button" value="Edit Start Date"/>	Duration (Months) 12	19.06	
<input checked="" type="radio"/> ESA-ESI-3Y-S1 Inbound Essentials Bundle(AS+AV+OF) 3YR Lic, 100-1...		Duration (Months) 36	41.93	
<input type="radio"/> ESA-ESI-5Y-S1 Inbound Essentials Bundle(AS+AV+OF) 5YR Lic, 100-1...		Duration (Months) 60	66.69	
			Cancel	Apply

3. Click **Apply** and then **Done** to make updates to the subscription.
4. Once these steps are completed and the Services/Subscriptions are configured, proceed normally with the Quote to Order process

6.6.3 Remove Services

There are multiple ways to remove services from a product. The following are the most common.

1. Select the Product lines that will have their services removed
2. Click on **More** to display the available options, if it has not already displayed.
3. Click on **Remove Services**. This will remove the attached services for all selected Product lines

Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)
Not Applicable	66,000.00	1	59,400.00	10.00	59,400.00
Service Start Date 29-Jun-2016	Duration 12 Months				
1.1 SBS4 24X7X4 3YR SMAL...	Not Applicable	1	7,549.00	00.00	7,549.00
2.0 W6-6509EXLFWNK9	Not Applicable	1	59,400.00	50.00	59,400.00

6.6.3.1 Remove services in Edit Service/Subscription page

1. On the Edit Service/Subscription page, click on the delete icon () next to the service program you want to remove. This will remove the service program for all products serviced by it.
2. Alternatively, if you only need to remove the service for one Product line, click on **Remove Service**, if applicable
3. Lastly, click on **Remove All Services** or **Remove All Additional Services** to remove accordingly.

Additional services can also be imported if saved as a configuration using [Import a Saved Configuration](#) (see [Importing an Estimate](#)).

6.7 Identifying Target Contract Numbers

You can set a target service contract, search for an existing target contract, or let the system automatically assign to an eligible contract when ordering services in Cisco Commerce.

- This functionality applies to services and software subscriptions.
- The Service Contract Number link will not display when ordering services that do not have a contract (for example: fixed scope consultancy SKUs).
- You must set the target contract for each line.

<input type="checkbox"/>	1.0 CISCO2911/K9 CP	Cisco 2911 w/3 GE,4 EHWIC,2 DSP,1 SM,256MB CF,512MB DRAM,IPB		14 days	2,695.00	<input type="button" value="1"/>	2,695.00
Valid as of 01-Mar-2016 10:06 EST

1.1 PWR-2911-AC IC	Cisco 2911 AC Power Supply			14 days	0.0	1	0.00

Order Page: Items Tab – Target Contract Number

The default option is established in your My Profile and Preferences. System Generated means that the system will try to match an existing contract. If a compatible contract is not found, a new contract number will be created. Alternately, you can set your default to have a new contract created.

To select a specific target contract number, complete the following steps:

- From the Order page, expand the line and click the edit icon next to Target Contract Number. The Contract Number dialog box displays.

Contract Number Dialog Box

- Select the appropriate option from the following and click **Continue**:

- System Generated (this is the default value). The system will generate a new contract if a compatible contract is not found.
- Use an Existing Contract: Enter the contract number
- Search for an Existing Contract Number: The system returns a list of valid contract numbers for that service line.
- Create a New Contract: The system will create a new contract, even if there are existing compatible contracts.

6.8 Identifying Flexible Service Start Delay (FSSD) Value

You can purchase a service at the point of product purchase and request a delayed service activation date of up to 60 days from the product ship date. A delayed service activation date results in a delayed service invoice date as well.

To identify the service start date, complete the following steps:

1. Navigate to the service line and click the edit icon next to Service Start Date. The Service Start Date dialog box displays.

<input type="checkbox"/> 1.0 CISCO2911/K9 CP Cisco 2911 w/3 GE,4 EHWIC,2 DSP,1 SM,256MB CF,512MB DRAM,IPB ECCN 5A002.A.1 Valid as of 01-Mar-2016 10:40 EST Edit options Change Service/Subscription Validate Add Note More Actions ▾	14 days	2,695.00	1	2,695.00
1.0.1 CON-SNT-2911 SNTC-8X5XNBD Cisco 2911 w/3 GE,4 ① Service Start Date 21 day(s) after Ship Date.	Not Applicable	453.0	1	453.00
1.1 PWR-2911-AC IC Cisco 2911 AC Power Supply ECCN EAR99	14 days	0.0	1	0.00

Order Details Page: Items Tab - Service Start Date

2. Select the desired start date from the drop-down list.
3. Click **Save**. The delay in service start is updated on the order.

Service Start Date

This applies to all services that are part of this configuration.

Service Start Date day(s) after Ship Date.
This determines when the service will be available to the end customer.

Service Start Date Dialog Box

See [Setting Default Services Options](#) for details on how to setup FSSD for all services in your order.

6.9 Adding a Smart Account

In order to standardize software licensing across Cisco, Assign Smart Account functionality is available in Cisco Commerce Order - Items tab.

With Smart licensing, you will be able to log in to your Smart Account to activate licenses and view all Smart Products you purchase from Cisco. Smart Accounts will be required when ordering Smart Products in Cisco Commerce.

Note: The **SA** icon displays for all Smart-Mandatory SKUs. For smart-optional SKUs, the assign now link will be available and the SA icon will not be displayed.

To assign a Smart Account, perform the following:

1. Click Assign Smart Account in the header area to assign a Smart Account for the entire order. Alternately, click Assign Now at the line level to assign a Smart Account for a single line. The Assign Smart Account dialog box opens.

2. Use the radio buttons to select the Smart Account Type and your assignment preference.
3. Begin typing the desired Smart Account in the search field. Select the appropriate account from the drop-down list of search results. Alternately, click Request New Customer Smart Account if the desired Smart Account does not exist. See the Smart Account Operations Exchange page for more information.
4. Click **Assign**. The Items tab refreshes with a Smart Account assigned.
5. Click the edit icon to change the assigned Smart Account or the delete icon to remove the assigned Smart Account.

The screenshot shows the Order Page with the Items tab selected. At the top right, there is a 'SMART ACCOUNT' button with a red box around it and a circled '1'. A modal dialog box titled 'Assign Smart Account' is open over the items list. Inside the dialog, several fields and options are visible:

- Smart Account will only be assigned to Smart Account enabled items.**
- Select Smart Account Type:** Two radio buttons are shown: 'Customer Smart Account' (selected) and 'Holding Smart Account'. The 'Customer Smart Account' button has a red box around it and a circled '2'.
- Search for a Customer Smart Account:** An input field with placeholder text 'Enter Smart Account Name or Domain Identifier (i.e. mycompany.com)' and a red box around it. To its right is a 'Request New Customer Smart Account' link.
- Assignment Options:** Two radio buttons: 'Assign to all current and future items in this order.' (selected) and 'Assign only to currently unassigned items.' The 'Assign to all current and future items in this order.' button has a red box around it and a circled '3'.
- Buttons at the bottom of the dialog:** 'Assign' and 'Cancel'.

Below the dialog, the main items list is partially visible. Item 1.0 (2911-FANASSY-) has a red box around its 'SA' button and a circled '1'. Item 2.0 (L-CSR-BB-128K-S-) also has a red box around its 'SA' button and a circled '1'. Both items have their details and quantity/price information displayed.

Order Page: Items Tabs Refreshed with Smart Account Information

6.10 Renewing Software Subscriptions

You can renew existing subscription contracts and create new subscription contracts Using Cisco Commerce, either directly through the Subscriptions tab or from within an order.

Note: This capability is limited in Cisco Commerce and has only been enabled for limited offers. Use [CSCC](#) to manage subscription offers that have not been enabled.

When adding a subscription renewal to an existing contract, you can co-term the end dates of the software subscription renewal to an existing contract. However, this feature in Cisco Commerce is available for 1-tier partners only.

Best Practices: Do not renew the same subscription through both Cisco Commerce Orders tab and CSCC.

To renew software subscription, complete the following steps:

1. Click [Add Renewal Subscriptions](#) to add software subscription renewals to the order. The Subscription page displays in a new window.

6.11 Adding and Deleting Item Notes or Comments

Cisco Commerce

Orders Tab

Create Order

Order Page: Items Tab

You can enter free-form notes at the major line level on an order.

Note: These notes are for your personal use only and will not put the order on hold, not raise a case, and not be systematically reviewed by Customer and Partner Services (CPS) team.

To create a note for a line, complete the following steps:

1. From the Order page: Items tab, click Add Note. The note field opens.
2. Click the field and enter up to 300 characters. This note is for your internal communication only. Cisco does not view this note.
3. Click **Save**. The note is now saved.

Order Page: Items Tab – Add note to a Line Item

To delete an order note, complete the following steps:

4. From the Order page: Items tab, click Edit Note. The Note field opens.
5. Click **Delete**. The note is deleted.

You can add notes on your Shipping and Install tab, see [Setting Order Shipping Options](#).

6.12 Populating the Purchase Order Line Reference

A PO Line Reference capability allows you to identify your internal Purchase Order (PO) line number to each Cisco Commerce order line.

To display the PO line reference field on order lines, you must go to your Order Preferences in My Profile and Preferences, and click the Yes radio button for PO Line References (see [Getting Started with Cisco Commerce User Guide](#)). The customer ID must also be set correctly for any entered values to appear on the invoice.

To populate the P.O. Line Reference field and cascade the information to the minor line levels, complete the following steps:

1. From the Order page: Items tab, click the P.O. Line Reference field.
2. Enter the purchase order number, for major and/or minor lines.
3. Click to automatically populate the purchase order line reference number in the minor lines for that major line. To verify that the purchase order number has populated through all lines, click to expand a major line item to view the minor lines.
Note that the purchase order number populates for all the minor lines.
4. Repeat these steps as applicable for all line items within the order.

	Hardware, Software and Services	P.O. Line Reference	Lead Time ⓘ	Unit List Price (USD)	Qty	Ext. List Price (USD)

Order Page: Items Tab – PO Line Reference

6.13 Removing a Line Item from an Order

You can remove a line item(s) from an unsubmitted order. To do so, complete the following steps:

1. From the Order page: Items tab, check the appropriate checkbox for the line to remove.
2. To select all the lines on an order, simply check the header level checkbox. This would apply to every line on the order.
3. Click **Remove Selected Lines**. The line item is removed.
4. If the order was converted from a quote, you can opt to remove the line item from both the quote and the order, click **Remove from Quote and Order**. The line item is removed from both the quote and the order.
5. To remove a single line, you can also select Remove Line from the More Actions drop-down menu for the desired line.

If you want to remove a line from a submitted order, see [Cancelling a Line](#). A Change Order must be initiated on a submitted order to change any of its attributes.

Remove Selected Lines **Validate** **Assign Smart Account**

Order Page: Items Tab – Remove from Order

6.14 Verifying Country Rules Validations

Country rules validations ensure that the items on an order are valid and orderable for the selected addresses.

When the order is submitted, country rule validations are automatically invoked. If all items pass the validations, the order will be submitted successfully. If the items do not pass the validations, an error at the header level will guide you to correct the issue. For example, an error will occur if an item fails validation for shipment to a specific country.

To avoid the error, click **Check Local Validations** before proceeding to the Discounts tab. A green success message will display once all items are verified to be orderable. An error message will display if the validation fails; hover over the red exclamation at the line level to view information on why the line failed the validation check.

Items **Discounts** **Shipping and Install** **Billing** **Review and Submit**

[Set preferences for this order](#) **Check Local Validations** **Save** **Save and Continue**

A Few lines on the order failed Country Rules Validation.

6.15 Reviewing Discounts

Cisco Commerce

Orders Tab

Create Order

Discounts Tab

From the Discounts tab, you can review the discounts for the order before proceeding through the remaining order process. For the Discounts tab in the Cisco Commerce Change Order process, see [Viewing the Discounts Tab in Change Order](#).

Only contractual discounts are applied as a part of a standalone order. No special pricing/discounts display on a standalone order. To apply discounts and special pricing, begin by creating a deal or quote (see the [Cisco Commerce Deals and Quotes User Guide](#)). For more information, see [Using a Reusable Nonstandard Discount](#).

Follow the given steps to review discounts:

1. From the Discount tab, click the View By drop-down arrow and click the appropriate option. The status can display by: Unit Net Price, Discount Type, Discount Details, Summary, or Product and Service Totals. The information on the page redistributes according to what display you select.
2. Click the edit icon to change the Intended Use. Select the appropriate option from the drop-down menu and click Update. The discounts may change based on the intended use of the order.
3. Click **Continue**. The Shipping and Install tab displays.

Order Page: Discounts Tab

6.16 Setting the Shipping and Installation Information

The Shipping and Install tab displays the default information from My Profile and Preferences section and the Order page.

6.16.1 Setting Order Shipping Options

Under the Order Shipping Options section, set shipping and install site related options as applicable. Click the information icon (ⓘ) corresponding to each section for more information.

- Billing e-mail: To enter a billing email address, click the Billing Email field. Enter the appropriate email address. To enter multiple email addresses, enter the addresses in a list separated by a comma.
- Ship All Items Separately: Indicate whether it is acceptable for Cisco to ship the items separately. Click the appropriate Ship All Items Separately radio button. If items are shipped separately then separate invoices will be generated. Please note that even in cases when you select NO, items will be shipped and invoiced separately if they originate from different manufacturing locations.
- Request Date Type: This field is automatically populated. If the field states “SHIP”, then Cisco will inform you of when your order is due to ship from our logistics center. If the field states “ARRIVAL”, then we will let you know when your order will arrive at the assigned destination. See the [Delivery Based Scheduling QRG](#) for more information.
- Shipping Notes: Click the Shipping Notes field and enter any information that should display on all packing slips and invoices.
- Carton Notes: Click the Carton Notes field and enter any information that should display on the carton label.

Order Page: Shipping and Install Tab

6.16.2 Adding Ultimate Consignee Details

To comply with U.S. federal regulations and track all shipped products to their ultimate install site, Cisco must capture ultimate consignee (UC) information for all orders (with at least one shippable good) that are being physically exported from Cisco (US).

Before submitting orders, you are required to populate the UC Address and UC Type fields. UC Address will default to the Ship To address and a separate entry will be required for each Ship To on an order. UC Type will be defaulted to Reseller. You will have the option of editing either of these fields. In addition, in the Review and Submit tab you will need to select an explicit agreement checkbox to allow Cisco to use the UC information displayed on your order (see [Submitting the Order](#)).

Ultimate Consignee											
<i>Note: If there are multiple consignees or a need to change consignee for submitted lines, please contact customer support.</i>											
Ultimate Consignee Address * 	Ultimate Consignee Type *

Reseller											

Order Page: Shipping and Install Tab – Ultimate Consignee

Note: This information ensures accurate UC reporting, and you are required to populate the UC information regardless of your region. Non-compliance with the UC reporting requirements carries potential fees and penalties.

To add UC information, complete the following steps:

1. Click **Add Address** in the Ultimate Consignee Address section. The Address Search dialog box displays.
2. Click the radio button for the appropriate address.
3. Click **Use Selected Address**.
4. To change the address, see [Adding or Changing the Shipping Address](#).
5. Click the Ultimate Consignee Type drop-down and select the appropriate option.
6. Hover over the information icon () for more information.

6.16.3 Managing Shipping Groups

From the Shipping Groups section of the Shipping and Install tab, you can:

- Create and rename a shipping group (see [Creating a Shipping Group](#))
- Move items among different shipping groups (see [Moving Items Between Shipping Groups](#))
- Delete a shipping group (see [Deleting a Shipping Group](#))

6.16.3.1 Creating a Shipping Group

The system automatically creates a Default Shipping group, with the addresses defaulting from the order header information. Newly added items are automatically assigned to this default shipping group.

You would create a new shipping group to provide different shipping or install site information for lines within an order.

Best Practice:

- Fixed Scope Consultancy products (SKUs that begin with ASF) should be in their own unique shipping group with the install site contact information for the Fixed Scope Consultancy service correctly identified. It is likely that this information will not be the same as the product install site information. See [Adding Fixed Scope Consultancy SKUs](#).
- If you create a new shipping group and move only the Fixed Scope Consultancy products to the new group, then the shipping preference, routing option, and shipping service options will not be required. Note that this is applicable to service-only orders as well.
- EXCEPTION: In cases where you add hardware AND a Fixed Scope Consultancy SKU to an order, and in the same shipping group (see [Moving Items Between Shipping Groups](#)), system will require the shipping preference, routing option, and shipping service options for the hardware product.
- Place remanufactured and new products in separate shipping groups.

To create a new shipping group, complete the following steps:

1. From the Shipping Groups section, click **Create New Shipping Group**. The Create New Shipping Group dialog box displays.

Shipping Groups				
Note: Shipping details are mandatory only if group contains shippable products.				
<input checked="" type="radio"/> Default Group				
Create New Shipping Group This is a default group.				
Shipping Address * <input type="text" value="G"/> SiteUseID 408 Address MOUNTAIN VIEW CA 94043 UNITED STATES	Install Site * <input type="text" value="ABC COMPANY NAME 123"/> SiteUseID 409 Address SAN JOSE CA 95131 UNITED STATES	End Customer * <input type="text" value="ABC COMPANY NAME 123"/> SiteUseID 409 Address SAN JOSE CA 95131 UNITED STATES		
Copy Address to: Install Site End Customer Ultimate Consignee Shipping Contact* Add Contact*			Copy Address to: Shipping Address End Customer Install Contact Add Contact <small>Add note to end customer</small>	

Order Page: Shipping and Install Tab – Shipping Groups Section

2. Click the Group Name field and enter a new group name.
3. Optionally, click the Copy Group From drop-down arrow and select an appropriate option.

The dialog box is titled "Create New Shipping Group". It contains a note: "Selected Group information will be copied to the group". There are two input fields: "Group Name" and "Copy Group From". The "Copy Group From" field has a dropdown menu showing "Default Group". At the bottom are "Cancel" and "Create New Shipping Group" buttons.

Create New Shipping Group Dialog Box

The items currently under the shipping group selected will be moved into the new shipping group being created. For moving items from shipping groups, see [Moving Items Between Shipping Groups](#).

4. Click **Create New Shipping Group**. The group is added below the Default Shipping Group.
5. Repeat these steps as necessary to create the required shipping groups.
6. Review the shipping group information. The default addresses display in the Shipping Group Addresses section. Change or copy addresses as previously indicated (see [Adding or Changing the Shipping Address and Contact](#)).

Best Practice: Name the shipping group based on the logical choice of grouping, for example: purchase order, install site country, or end customer.

To change the name of a shipping group, complete the following steps:

1. Click the edit icon next to the group name. Change Group Name dialog box displays.

The screenshot shows the "Shipping Groups" section of the Order Page. It includes a note: "Note: Shipping details are mandatory only if group contains shippable products." A radio button labeled "Default Group" is selected. To its right is a red box with a white edit icon and the number "1". Below the radio button are fields for "Shipping Address" and "Install Site", both marked with a red asterisk indicating they are required.

Order Page: Shipping and Install Tab – Shipping Groups Section

2. Click the Group Name field and enter a new name.
3. Click **Change Group Name**. The Shipping Groups section refreshes to display the new shipping group name.

The dialog box is titled "Change Group Name". It has a single input field labeled "Group Name *". Inside the field, the text "RF-US" is entered. At the bottom are "Cancel" and "Change Group Name" buttons.

Change Group Name Dialog Box

6.16.4 Moving Items Between Shipping Groups

To move items from one shipping group into a different shipping group, complete the following steps:

- From the Shipping and Install tab, go to the shipping group from where you need to move products or services to a different shipping group. Click (+) to expand the Line Items section.

Line Items				
	Qty	Delivery Method	End Customer Email	Lead Time
<input type="checkbox"/> 1.0 WS-C6509-V-E= ⓘ	1	PHYSICAL		21 days
<input checked="" type="checkbox"/> 2.0 WS-C6509-V-E= ⓘ	3	PHYSICAL		21 days
<input type="button" value="Change Group"/> Select One		▼	3	Next >
		showing 1 - 2 of 2 Line Items		◀ Previous 1 ▶ Next

Order Page: Shipping and Install Tab – Shipping Group Section

- Check the appropriate checkbox(es) to indicate which items will be moved to another shipping group.
- Click the Change Group drop-down arrow and select the appropriate shipping group. The Moving Lines Confirmation dialog box displays.
- Click **OK**. The items no longer display in the Default Shipping Group.
- Repeat the above steps for all items that must be moved to other shipping groups.

6.16.5 Deleting a Shipping Group

You can delete any shipping group, except the default shipping group created by the system.

To delete a shipping group, complete the following steps:

- Click the delete icon. The icon is only visible for added shipping groups. It is not visible for the Default Shipping Group. The Delete Group dialog box displays.

<input type="button" value="⊕"/> test	
<input type="button" value="⊕"/> test2	
<input type="button" value="Check Local Validations"/> <input type="button" value="Save"/> <input type="button" value="Save and Continue >"/>	

Order Page: Shipping and Install Tab – Shipping Groups Section

If the group to be deleted has items assigned to it, you would need to move the items to a different group before deleting it.

- Click the Assign Items To drop-down arrow and select a group to which you wish to move items to.
- Click **Confirm and Delete** to delete the group and move the line items to the chosen group.

For managing a shipping group in Cisco Commerce Change Order, see [Changing Shipping Attributes](#).

Delete Group Dialog Box

6.16.6 Populating Shipping Information

In the Shipping Information section, the Request Date, Routing Option, and Shipping Service Options are mandatory drop-down menus.

Delivery options will be available for you to select specific delivery preferences and add additional delivery information.

- The options displayed are based on a routing option selected in the drop-down menu (Cisco routed or Self routed), the type of order created, and the user ID's CCO ID credentials.
- These options will only be available for orders that contain shippable hardware or software products. Service only orders and e-delivery only (software) orders will not display these delivery options.
- The delivery options display as Yes or No radio buttons and the default value for all options is selected as No.

6.16.6.1 Setting Cisco as Routing Option

If Cisco is the selected Routing Option, then complete the following steps:

1. The Carrier Override List and Carrier Account # display as blank fields and are not editable.
2. Select the appropriate options under Delivery Options: Pre-shipment Inspection and Special Transport.
3. If you select the Special Transport radio button as Yes, the Add a Note icon will display.
4. Click the Add a Note icon.
5. The Add Special Transport Note dialog box displays. Click the text field and enter up to 300 characters to communicate any specific requests.
6. Click **Save**.

Order Page: Shipping and Install Tab – Cisco Routed

6.16.6.2 Setting Self as the Routing Option

If you selected Self as the Routing Option then complete the following steps:

1. Select your desired service level from the Shipping Service Options drop-down menu.
2. The Carrier Override List drop-down menu is active and editable. Once you select the carrier, the Carrier Account # field activates and you can add an account number, if necessary.
3. For self-routing, the available delivery options expand to include Special Delivery Time, Carrier Will Call, Contact Prior to Delivery, Pre-shipment Inspection, Authorized Receiving Party, Remove Packaging, Inside Delivery, and Special Transport.
4. If some radio buttons are selected as Yes, the Add a Note icon displays.
5. Once clicked, a dialog box displays. Click the text field and enter extra information about the specific shipping options for the order. Enter up to 300 characters to communicate any special requests.
6. Click the information icons, where displayed, to learn more.

You will be able to modify delivery options in the change order process as well. See [Changing Shipping Attributes](#).

6.17 Verifying Billing Information

Click the Billing tab.

You can change the information on the Billing tab. However, changing information on the Billing tab may result in additional errors or changes in other order information. If there are red error messages at the top of the page, these must be fixed before the order can be submitted. Yellow warning messages may indicate other optional changes could be performed, or provide important status information.

Items	Discounts	Shipping and Install	Billing	Review and Submit

Order Page: Billing Tab

6.17.1 Verifying Tax Information

The tax information section displays the taxability and your tax status. To select the taxability option, click the Taxability drop-down arrow on the Billing tab and select the appropriate option.

- Internal Use: If the purchases in this transaction are to be used internally, not to be resold, and do not qualify for a state exemption, select Internal Use. The appropriate tax will be charged.
- Resale: If the purchases in this transaction are for resale purposes, select Resale. In order to select this option, you must be registered as a wholesaler, reseller, or leasing company. If a valid (current) resale certificate has not been provided to Cisco, the appropriate tax will be charged and added to the invoice.
- State/Federal or Direct Pay Permit Exemption: Applicable for a federal government entity that qualifies for a state regulation exemption (for example, home office exemption, non-profit organization, school, state agency) or is a direct pay permit holder. If the purchases in this transaction are for export, select State/Federal or Direct Pay Permit Exemption. If a valid (current) exemption certificate or copy of the direct pay permit has not been provided to Cisco, the appropriate tax will be charged and added to the invoice.

The screenshot shows a portion of the Order Page under the Billing Tab. On the left, there are sections for Tax Information*, Billing and Contacts Information*, and Payment Information*. On the right, a dropdown menu titled "Taxability * ⓘ" is open, showing four options: "Select", "Internal Use", "Resale", and "State/Federal or Direct Pay Permit Exemptions".

Order Page: Billing Tab – Tax Information Section

Note: A tax note field displays for you to enter additional tax instructions for orders containing the following information:

- The ship-to state is MA, MS, RI, or TN.
- The taxability is resale.
- The tax status is non-exempt.

If not all the requirements above are met, then the Tax Note field will not display on the Billing tab.

The order is placed on hold until the third-party certificate is received and confirmed. To enter special instructions in the Tax Note field, click the Tax Note field and enter the desired information.

6.17.2 Populating the Billing Information Section

The billing information section displays the billing address and various contact information. Updating the billing address and contacts is the same as populating and changing any other address and contact, see [Changing the Billing Address and Contact](#). Use the edit icon to change the address or contact and the delete icon to remove the contact.

Order Page: Billing Tab - Billing Information Section

6.17.3 Populating the Payment Information Section

If your billing ID (BID) is US or Canada and you are eligible for the credit card payment method, the option to select the credit card payment displays on the Payment Information tab.

Best Practice: The credit card information defaults from your My Profile and Preferences section. Refer to the [Getting Started with Cisco Commerce User Guide](#) to add a credit card to your profile.

If the BID is not from the US or Canada, you will not be eligible for credit card payment method, and the credit card payment option does not display.

To select a credit card as the payment method, complete the following steps:

1. Click the Payment Information tab.
2. Under the Payment Information section, click the Credit Card radio button.
3. Under the Credit Card Information section, a checkmark indicates the default credit card, which will be charged for the order. To select a different card from the profile, click the desired card.
4. You can add a new credit card by clicking **+ New Card**. Enter all required information and click **Save**.

Order Page: Billing Tab – Credit Card Option

6.17.3.1 Using a Purchase Order (PO) Payment

If the BID is not from the US or Canada, you will not be eligible for credit card payment method, and the credit card payment option does not display.

If eligible for credit card payment, but purchase order is preferred, select purchase order as the payment method.

To select purchase order as the payment method, complete the following steps:

1. Click the Payment Information tab.
2. Under the Payment Information section, click the Purchase Order radio button.
3. To attach a copy of the Purchase Order, click Upload New Attachment. The Upload Files dialog box displays.

The screenshot shows the 'Order Page: Billing Tab – Attach Purchase Order Section'. The 'Payment Information' tab is active. In the 'PAYOUT METHOD' section, the 'Purchase Order' radio button is selected. Below this, there's a 'Attached Purchase Orders' section with a red circle around the 'Upload New Attachment' button. A note at the bottom states: 'Note: Cisco is providing a repository of customer PO's for convenience only. By uploading the PO, Cisco does not undertake any verification of the PO against the order.'

Order Page: Billing Tab – Attach Purchase Order Section

4. Browse and select the appropriate file and click **Attach**.
5. To remove the purchase order attached, click the appropriate checkbox and click **Remove Selected Lines**.

Attaching a PO is for your convenience and record, Cisco does not undertake any verification of the PO against the order.

6.18 Reviewing and Submitting the Order

There are cases when some of the tab icons may display in red with error messages on top.

You can review the financial summary, order summary and modify, if required, the order submission notification on the Review and Submit tab.

If all tabs are correctly populated, you have checked the box indicating that you accept the terms and conditions, and have confirmed ultimate consignee information, then the Submit Order button will be enabled.

Financial Summary All prices shown in USD

If Mandatory service are attached they will be taxable

Order Note (Note: Max 300 characters.)

Order Page: Review and Submit Tab

Note: The Submit Order button will not be displayed if:

- You are not eligible to submit orders in Cisco Commerce
- You have not checked the box to accept the Terms and Conditions
- You have not confirmed the Ultimate Consignee Information

Click on the respective tab icons to resolve issues in order to submit the order.

Order Page: Review and Submit Tab – Error Messages

- Blue: If there are no errors for a specific tab, the corresponding icon displays as blue in color.
- Yellow: Warnings displayed in yellow may be fixed but are not required to be fixed. However, if errors are not fixed before submission, then delays in booking and scheduling of the order may result.
- Red: All errors displayed in red must be fixed prior to submitting an order. The icon corresponding to the tab in which the error has occurred also appears red.

Best Practice: Click **Save and Continue** in each tab before proceeding to Review and Submit tab. This reduces the number of errors displayed during order submission.

6.18.1 Adding Landing Costs and Freight Charges

On the Review and Submit tab, you will be prompted to add a landing SKU to the order in the following cases:

- Order shipping country is Canada
- Order billing ID is other than 28949 (Cisco Canada)
- Price list on the order is other than Global Canada Price List in Canadian Dollars, Global Canada Legacy Price List in Canadian Dollars, or Wholesale Canada Price List in Canadian Dollars
- Order is a standard order

Landing cost SKUs are applicable to standard orders shipped to Canada using non-Canadian price lists. You can search and add these SKUs on the Items tab and review Discounts tab to price the SKU.

See [Adding Landing Cost SKUs](#) for more information on landing costs and [Adding Freight Charge SKUs](#) for more information on freight charges.

6.18.1.1 Adding Landing Cost SKUs

Review the conditions for adding a landing cost SKU (See [Adding Landing Costs and Freight Charges](#)). Landing cost SKUs will be 10% of the total product order. There will be no discounts on landing cost SKUs. The order total and respective discounts will update with the new price calculated for the landing cost SKU.

You can add only one landing cost SKU per order. If you add more, the system will not allow you to submit the order.

To add a landing cost SKU, complete the following steps:

1. On the Order page: Items tab, click the Add Product Item field and enter LND-COST.
2. Click **Add**. The SKU is added to the list of items.
3. Continue to [Adding Freight Charge SKUs](#).

The screenshot shows the Order Page with the Items tab selected. At the top, there are tabs for Items, Discounts, Shipping and Install, Billing, and Review and Submit. Below these are buttons for Check Local Validations, Save, and Save and Continue. A dropdown menu says 'Set preferences for this order'. On the right, there are buttons for Find Products and Solutions and More Actions. The main area shows a table with a single row for 'LND-COST'. The columns are Part Number, Description, Product Family, and List Price. The 'Part Number' column contains 'LND-COST', the 'Description' column contains 'Cost for Freight, Fees, Tax', and the 'List Price' column contains '1.0'. To the right of the table, there are buttons for Show All Items, Qty, and Ext. List Price. A note at the bottom says 'Can't Find? Search and find products and solutions.'

Order Page: Items Tab – Landing Cost SKU

6.18.1.2 Adding Freight Charge SKUs

You can search for the freight charge SKU on Items tab and can modify the quantity. You can add only a quantity of one per freight charge SKU, but there is no restriction to the number of freight charge SKUs that can be ordered.

Freight charge SKUs are treated as miscellaneous lines. There will be no discount on these SKUs.

To add a freight charge SKU, complete the following steps:

1. On the Order page: Items tab, click the Add Product Item field and enter FREIGHT.
2. Click **Add**.
3. Click **Save and Continue** until you reach the Review and Submit tab to submit the order.

The screenshot shows the Order Page with the 'Items' tab selected. At the top, there are tabs for 'Items', 'Discounts', 'Shipping and Install', 'Billing', and 'Review and Submit'. Below the tabs is a section titled 'Set preferences for this order' with buttons for 'Check Local Validations', 'Save', and 'Save and Continue'. The main area displays a table of Freight Charge SKUs:

FREIGHT		1	Add	Find Products and Solutions More Actions		
Part Number	Description	Product Family	List Price	By	Show All Items	
FREIGHT CHARGES	FREIGHT CHARGES		0.0	Unit Price (USD)	Qty	Ext. List Price (USD)
FREIGHT_CHARGE_RF	FREIGHT CHARGES REMANUFACTURED PRODUCTS		1.0			
LND-COST	Cost for Freight, Fees, Tax		1.0	\$95.00	1	9,995.00

At the bottom of the table, there is a link: 'Can't Find? Search and find products and solutions.'

Order Page: Items Tab – Freight Charge SKU

6.18.2 Submitting the Order

When submitting the order, you can populate the order note, order notification details, and order submission confirmation e-mail.

1. Click the Order Note field to add any instructions for those who have access to the order. Cisco does not review this note for the ordering.

The screenshot shows the Order Page with the 'Review and Submit' tab selected. It includes sections for 'Financial Summary', 'Order Summary', and 'Order Submission Notification'.

Financial Summary: Shows a breakdown of prices and discounts, including a note: "If Mandatory service are attached they will be taxable".

Order Summary: Displays customer information: ABC COMPANY NAME 123, SiteUseID 409161482, Address 1275 COMPONENT DR, SAN JOSE, CA, 95131, UNITED STATES.

Order Note: A text input field containing "Test".

Note: Max 300 characters.

Order Submission Notification: Fields for First Name, Last Name, phone number (test@email.com), fax number, and an email address input field (test@email.com) which is highlighted with a red box and circled with a red number 3.

Note: Multiple email addresses can be entered using comma. Format ex: xxx@yyy.com, aaa@bbb.com

Order Page: Review and Submit Tab

2. Populate the Order Submission Notification details for Cisco to contact, if need be. This section is not required, but it is recommended. These fields are not search fields; all of the information should be entered completely and accurately. It is not necessary to complete all fields.

3. Enter email contacts in the blank field separated by a comma to send order submission notifications.
4. Check the box to indicate that you accept the Terms and Conditions.
5. Click **Submit Order** when done.

Once the order is submitted, the Submission Confirmed page displays. You can view the submitted order by clicking **View Submitted Order**.

Submission Confirmed

Thank you for placing Web Order ID #67687074 with Cisco.
You will be notified according to your notification preferences once Cisco begins processing your order.

7 Using a Reusable Nonstandard Discount

A Cisco Account Manager (AM) might provide a Reusable Nonstandard Discount (RNSD) to a partner. Unlike regular quotes that have to be collaborated, you can use an RNSD directly in Cisco Commerce after the Cisco AM provides you the deal ID and approved discounts.

Best Practice: Reference the RNSD deal ID at the beginning of the order process. However, if your order will include Try and Buy, trade-in items, and/or distribution fulfillment, you must start with a quote. See the [Cisco Commerce Deals and Quotes User Guide](#) for information on applying an RNSD to a quote. These must be provided to you by a Cisco AM.

Note that you cannot search for RNSDs using Cisco Commerce Search options.

Only Cisco sales teams can create an RNSD. Once approved, a Cisco AM must communicate the deal ID and discount information to you so the order can be created with the appropriate discounts.

To create an order that references an RNSD, complete the following steps:

1. Create an order with a deal ID (see [Converting Quotes to Orders](#)). Enter the RNSD deal ID provided by the Cisco AM in the Deal Id field on the initial Order page and click **Continue**.

Create an Order Page: RNSD Deal ID

Note: You can apply discounts to spare equivalents. See [Adding a Spare](#). For example, if an RNSD is set up for WS-C6509-E, the discount will be applied on both WS-C6509-E and WS-C6509-E=.

The system will display warnings and provide explanations when the RNSD is consumed, not in approved status, expired, not migrated to EDMS, not an RNSD, or the deal ID is not found.

2. Once the RNSD is applied, follow the standard steps for ordering by entering all necessary information (including any additional SKUs) and submit the order (see [Verifying the Order Initiation Page Details](#)).

Depending on how the Cisco AM sets up the RNSD, you may see one of two things:

- Discounts may auto-apply to approved line items (products or service).
- An editable discount field will display where the discount information should be entered.

If the discount entered is greater than the amount provided by the AM, an error message displays. If this occurs, you should contact the AM to confirm the agreed-upon discount and try again.

If the product or service is not included on the RNSD, only the standard contractual discount will auto-populate. You should contact the Cisco AM if you believe the items should be receiving a discount not reflected on the order or quote.

8 Creating Service Only Orders

You can create a service-only order within Cisco Commerce by either creating a standalone order, or converting an approved quote to an order. How the quote was created will determine the exact steps needed to complete the service only order. See the [Cisco Commerce Service Only Quick Reference Guide](#) for step-by-step instructions on how to detach, and subsequently order, services.

For quote-converted orders, if you detach services from your order after May 22, 2016, those service lines will contain all necessary product information and will be automatically added to the original quote. You can then order those services separately at a later time without having to search for the original product information (e.g., serial numbers, sales order numbers). See the [Detached Services User Guide](#) for more information.

9 Viewing the Order Status

Cisco Commerce

Orders Tab

View All

Order Details
Page: Items Tab

You can view the status of an order on the Orders tab.

	Order Name	Sales Order No.	Web Order ID	Customer Smart Account Status	Status	Submitted Date

9.1 Viewing the Order Details

The Order Details Page allows you to review Items, Discounts, Shipping & Install, Billing and Invoice, and Order History tabs.

9.1.1 Viewing the Items Tab

The Order Details page displays the Items tab by default. To review the status of line items, complete the following steps:

1. Review the Line Item Status Summary of the order and all of the information from the order tabs. The Order History tab is one of the most important tabs in the Order Details page.
The Line Item Status Summary displays the count of lines at each given status. It also displays information on the shipment preparation status of each line item.
2. Review the line item status detail by clicking Show Me below each status. Line items that are in Shipment Preparation display.
3. Click Order Status Definitions to view the definitions of the order status.
4. The Order Details page: Items tab also displays the list of bundles, major and minor lines, ship date, serial numbers, price information, and the order status at the major line level.

Serial Numbers **7**

Order Details Page: Items Tab

5. Click All Serial Numbers and All PAK Numbers to view serial numbers and Product Access Key (PAK) numbers.
6. Click **Export Serial Data** to export the serial numbers to a Microsoft Excel file and save.
7. Else, click Serial Numbers for each line item to view the serial numbers for only that line item. You can also select and copy the serial numbers to paste into a document.

Note: You can view the International Mobile Equipment Identity (IMEI) number and the SIM Serial Number (ICCID) along with the Serial Number. Export the IMEI and/or ICCID numbers as soon as the product ships to reduce downtime for modem or cellular service activation.

9.1.1.1 Viewing Status of Remanufactured Items

The status of remanufactured products or Refresh displays separately from the status of new products since the fulfillment is through a third party. Click Remanufactured Status. The Remanufactured Status dialog box displays.

Order Details Page

Remanufactured Status				
Line Number	Item Name	Quantity	Status	Serial Numbers
1.0	ME-C3750-24TE-M-RF	1	Processing	
2.0	ME-C3750-24TE-M-RF	10	Processing	
3.0	ME-C3750-24TE-M-RF	10	Processing	

Remanufactured Status Dialog Box

The status of the remanufactured equipment order displays as one of the following:

Status	Description
Processing	Order has been submitted in Cisco Commerce but is waiting for inventory to become available at the warehouses
Scheduled	Inventory is available at the appropriate shipment site, but the order has not yet shipped
Shipped	The order has been shipped and is eligible for invoicing in Cisco Commerce. Invoices can be seen on the Billing and Invoice tab in View Status
Error	There was a technical error while processing the order. Cisco's technical support has been notified

9.1.2 Viewing the Discounts Tab

Click the discounts tab. All of the discounting details from multiple sources are listed on one page. If there are any price differences in a Business-to-Business order, the price is captured as an amount associated with a tag: Other - Unverified Charge or Other - Unverified Discount.

- Other - Unverified Discount displays when the partner submits a net price less than the system calculated net price.
- Other - Unverified Charge displays when the partner submits a net price greater than the system calculated net price.

9.1.5 Viewing the Order History Tab

Click the Order History tab. The Order History tab records all the change requests and the details of the changes made to the order, including the requester's name and date of change request.

Use the export and print functionalities on the Order History tab to retrieve any version of an attached purchase order. Click View Details to see a comparison of what's changed from the previous version of the order.

10 Updating or Cancelling a Submitted Order

You can use the self-serve Change Order functionality to make changes and cancellations on both quote-converted and standalone orders using Cisco Commerce. The Change Order functionality mirrors the look and feel of the initial order creation in Cisco Commerce.

Submitted orders are available for users to view on the CCW Order Details page. For orders that are eligible for cancellation requests (see [Cancelling the Order](#)) or change requests (see [Initiating Change Order](#)), **Change Order | Cancel Entire Order** displays on the Order Details page.

Order Details Page

Change Order functionality is not available in the following scenarios:

- An order cancellation request is in progress and the change request is not yet submitted.
- A previous change order request is still open and in Unsubmitted status.
- There is already a submitted change order that has placed the order on hold.
- Another user is making a change.
- Price impacting changes are not allowed for trade-in orders, or orders with the following payment types: DOC, PREPAYMENT, CASH AGAINST DOCUMENTS, or COD.
- All lines / ship set status have reached the point of no return (PONR). There is a single PONR for each line.
 - Product lines are eligible for change until the line reaches Production in Progress status. When manufacturing has started, no more changes are allowed to any attributes related to the line.
 - Service lines with entitlement status of Awaiting Fulfillment will be eligible for changes. When a service contract gets created, you will no longer be allowed to make any changes to the line.
 - Lines with the delivery option for electronic delivery and with status eDispatch Eligible can be changed. Beyond this point, you cannot modify or cancel any part of the line.

10.1 Cancelling the Order

If none of the lines on an order have passed the PONR, the entire order can be cancelled. Once an order is cancelled, it cannot be reinstated. AMs will receive a notification for all cancellation requests (either lines on an order or an entire order).

To cancel an entire order, complete the following steps:

1. Open a submitted order. To perform a search using the Cisco Commerce Search functionality, refer to the [Getting Started with Cisco Commerce User Guide](#).
2. From the Order Details page, click **Change Order | Cancel Entire Order**. The Change/Cancel Order confirmation dialog box displays.

Change/Cancel Order Dialog Box

3. From the Change/Cancel Order dialog box, click **Cancel Entire Order**. The Cancel Entire Order dialog box displays. A reason for cancellation is required.
4. Click the drop-down arrow and click one of the reasons:
 - Duplicate PO
 - Customer Cancelled Order
 - Other
5. Click **Submit Request**.

Cancel Entire Order Dialog Box

10.2 Initiating Change Order

To initiate a change order request, complete the following steps:

1. Open a submitted order. To perform a search using the Cisco Commerce Search functionality, refer to the [Getting Started with Cisco Commerce User Guide](#).

2. From the Order Details page, click **Change Order | Cancel Entire Order**. The Change/Cancel Order confirmation dialog box displays.

Change/Cancel Order Dialog Box

3. From the Change/Cancel Order dialog box, click **Change Order**. The Change Order dialog box displays with a message informing that the order will be placed on hold. A change order hold will remain on the order until the change request is cancelled or change has been submitted and applied to the order.
4. Click **OK** to proceed to Cisco Commerce Change Order.

Note: If you do not submit changes on the order within 24 hours, then the change order request will be discarded.

Change Order Dialog Box

You can make the following changes through Cisco Commerce Change Order:

- Change Attributes on the Items Tab (see [Changing Attributes on the Items Tab](#))
- Review Discounts (see [Viewing the Discounts Tab in Change Order](#))
- Change Shipping Attributes (see [Changing Shipping Attributes](#))
- Change Attributes on the Billing Tab (see [Changing Attributes on the Billing Tab](#))
- Change Credit Card Orders (see [Changing Credit Card Orders \(US and Canada\)](#))

10.2.1 Changing Attributes on the Items Tab

From the Order Details page: Items tab, several attributes can be changed.

Note: For government orders, the Government Order flag and TAA compliance selection cannot be modified.

For existing items that are on the order as a bundle, you cannot cancel the major lines within a bundle. You can cancel the entire bundle if it has not passed the PONR.

You cannot make changes to any attribute for lines that have passed the PONR

10.2.1.1 Updating the Purchase Order Number

You can update the purchase order number by clicking the edit icon. The field becomes editable. Enter the new purchase order number and click Update.

The screenshot shows the 'Order Details Page: Purchase Order Number'. At the top, there are navigation links: Favorites, Export, Print, Email, Share, Discard Changes, and More. Below this, the 'ORDER NAME' is listed as 'testordermw1'. The 'PURCHASE ORDER #' field contains '1234' and has an 'Update/Cancel' button. Other fields include 'WEB ORDER ID' (67687074), 'STATUS' (CHANGE IN-PROGRESS), 'SMART ACCOUNT' (Assign Smart Account), 'CREATED BY' (m on 01-Mar-2016), 'LAST UPDATED BY' (m on 02-Mar-2016), 'DEAL ID' (Not Applicable), 'DEAL NAME' (Not Applicable), and 'QUOTE STATUS' (Not Applicable). At the bottom, there are tabs for Items, Discounts, Shipping and Install, Billing, and Review and Submit.

Order Details Page: Purchase Order Number

10.2.1.2 Modifying the Existing Lines

To modify existing lines, complete the following steps:

1. Click Modify Configuration. The configuration expands with additional functionalities.

Once the configuration expands, you can opt to make changes to many attributes.

The screenshot shows the 'Order Details Page: Items Tab – Modify Configuration'. It displays a table with columns: Select, Description, P.O. Line Reference, Lead Time, Unit List Price (USD), Qty, and Ext. List Price (USD). There are two rows. The first row is for 'Hardware, Software and Services'. The second row is for '1.0 CISCO2911/K9 CP'. This row shows details: Cisco 2911 w/3 GE,4 EHWIC,2 DSP,1 SM,256MB CF,512MB DRAM,IPB ECCN 5A002.A.1. It also shows a note: 'Valid as of 03-Mar-2016 08:42 EST' and a 'Modify Configuration' button.

Order Details Page: Items Tab – Modify Configuration

2. Select Options and/or Services: see [Choosing Options and Resolving Issues](#).
3. Add or change P.O. Line Reference by line, if applicable: see [Populating the Purchase Order Line Reference](#).
4. Adjust the Quantity: see [Setting Quantities for Products](#).

Order Details Page: Items Tab of a Quote-Converted Order

10.2.1.3 Cancelling a Line

You can cancel the lines from the order that have not yet passed the PONR. Lines past the PONR will be grayed out and will not have checkboxes. A cancellation reason will be required for all cancellation requests.

To cancel a line on an order that is in the process of being changed:

- From the Order Details page: Items tab, click [Modify Configuration](#).
- Check the appropriate checkbox(es) for lines that need to be removed from the order.

Note: You can also check the checkbox next to a newly added line and click **Remove from Order** to delete the line item.

Order Details Page: Items Tab – Cancel a Line

- Click **Cancel Lines**. The Cancel Line dialog box displays.
- Click the Reason drop-down arrow and click one of the cancellation reasons.
- Click **Submit Request**.

Cancel Line Dialog Box

10.2.1.4 Adding a New Line

You can add new lines to an order being changed in three ways, just as with any other order (See [Adding Items to the Order](#)):

1. Use the Find Products and Solutions functionality to search for and add products by SKU, description, or product family: see [Finding Items Using a Search](#)
2. Import a saved configuration: see [Importing an Estimate](#)
3. Enter a full or partial SKU: see [Adding Items by SKU](#)

Order Details Page: Items Tab - Adding Items

10.2.1.5 Modifying Other Service Line Information

You can modify the Service Contract Number ([Identifying Target Contract Numbers](#)) for the services in the items tab, change the service start date for service-only lines when eligible (see [Error! Reference source not found.](#)), and change the FSSD value when eligible (see [Identifying Flexible Service Start Delay \(FSSD\) Value](#)).

10.2.2 Viewing the Discounts Tab in Change Order

From the Discounts tab, review the discounts for the order.

- Discounts are populated based on the linked deal ID or per standard contractual discounts.
- Discounts cannot usually be modified.
- For new or existing lines that are linked to an RNSD, depending on how the Cisco AM has set up the deal, discounts may be applied to the order, or there could be a discount box where you can enter the discount communicated by the Cisco AM. See [Using a Reusable Nonstandard Discount](#).

Note: If you have converted the order from a quote, new lines added from the quote will receive approved quote pricing. New lines added to an order that are not on the original quote will be priced with standard contractual discounts.

If the changes requested on the order result in nonstandard discounts that are beyond what is approved on the quote, the order will remain on hold while the quote undergoes re-approval.

		2,181.41	1	2,181.41	
Core Category - SI - Internal - USD		32.00	862.40		

Order Details Page: Discounts Tab

10.2.3 Changing Shipping Attributes

You can modify all header level shipping fields from the Shipping and Install tab. The following changes are allowed in the Order Shipping Options section (see [Setting Order Shipping Options](#)):

- Add, remove, or edit billing emails
- Add, remove, or edit shipping notes
- Add, remove, or edit carton notes

Note: The attributes on the Shipping and Install tab can be changed until the order header level status reaches “Logistics Warehouse”.

10.2.3.1 Editing a Shipping Group in Change Order

You can move the existing lines to new shipping groups or the default shipping group, but not to other existing shipping groups.

For each shipping group, you can modify the following fields (see [Managing Shipping Groups](#)):

- Address and contact information
- Requested ship date
- Routing option
- Shipping service option
- Carrier (editable field not shown, only available for Self Routed option)
- Carrier account number (editable field not shown, only available for Self Routed option)
- Delivery options (specific fields will vary based on routing option selected). See [Populating Shipping Information](#).

Note: You cannot make changes to shipping groups that have passed the PONR.

Shipping Groups	
Note: Shipping details are mandatory only if group contains shippable products.	
<input type="button" value="+"/> Default Group	<input type="button" value="i"/> Create New Shipping Group
<input type="button" value="+"/> Shipset-1	<input checked="" type="checkbox"/> This is a default group.
<input type="button" value="+"/> Shipset-2	

Order Details Page: Shipping and Install Tab – Shipping Groups

10.2.3.2 Placing New Lines in Shipping Groups

New lines added to the order are automatically placed in the default shipping group. You can move them to a newly created shipping group, but not into existing shipping groups (see [Moving Items Between Shipping Groups](#)).

Note: You cannot move a line whose status displays as “Production in Progress”.

10.2.4 Changing Attributes on the Billing Tab

Changing information on the Billing tab may impact tax, service pricing, and service configuration on the order. The following changes are allowed on the Billing tab in change order:

- Change the taxability. System validations performed for this change will mirror those done in the place order process. See [Verifying Tax Information](#).
- Attach or remove purchase orders.

Items	Discounts	Shipping and Install	Billing	Review and Submit
<input type="button" value="Check Local Validations"/> <input type="button" value="Save"/> <input type="button" value="Save and Continue >"/>				
Warning: Changing information on this page may impact tax, Service Pricing and Service Configuration.				
i You designated this order for internal use. Taxes may be applied to the invoice.				
i Please note: Tax status is only an estimate				
Tax Information * Billing and Contacts Information * Payment Information *	Taxability * i Internal Use	Your Tax Status NON-EXEMPT		

Order Details Page: Billing Tab – Tax Information Section

Note: You cannot modify billing address, payment terms, and payment types.

10.2.4.1 Changing Credit Card Orders (US and Canada)

If you had marked the original order with payment option as credit card, then you can change the selected credit card. The currently selected card will be highlighted with an orange checkmark.

If the preferred credit card is not available, add the credit card information in your My Profile and Preferences. See [Populating the Payment Information Section](#).

10.2.5 Reviewing and Submitting the Change Request

The Review and Submit tab displays a link to a summary of the changes made to the order. System validations will update the status of each section of the order. See [Reviewing and Submitting the Order](#). Follow the guiding messages to address any errors in each tab. Click **Submit Order** to submit the change request.

The change order hold will be removed from the order once the change request is processed and approved.

Order Details Page: Review and Submit Tab

Order Details Page: Review and Submit tab - Change Order Summary

10.2.6 Discarding Changes

To discard changes at any given time, click **Discard Changes**. The Discard Changes dialog box displays. Select **Submit Request** to revert the Order to its previous version.

Common Utilities bar: Discard Changes

11 Managing Invoices

If the system has generated an invoice, then you can use exported invoices for payment / legal / customs purposes. If there is not a system-generated invoice, you can create a pro forma invoice which cannot be used for legal purposes but can serve as an estimate prior to the availability of the actual invoice.

Invoices will be printed in English for Japan and Quebec.

Note:

- The same tax data elements display directly on the Invoice Details page and the PDF invoice copy.
- Canada theater only displays the Cisco Systems Canada Corp. Canadian GST registration number will be displayed on all Canadian transactions (credit memo / debit memo / invoices).
- EMEA theater only displays the following tax attributes: Customer VAT Number, VAT Amount, Tax Code, Tax Rate, Exchange Rate used to convert VAT Amount to local currency, Tax Message, Service Reference Message, Doc Sequence Number.
- All theaters display the freight amount as “Freight,” not as “Shipping and Handling”.
- All theaters display trade-in amounts at line level.
- For all theaters, the original tax data elements will be maintained to ensure that those elements do not change after the invoice has been generated.

11.1 Viewing Invoices

You can access invoices in two ways:

- From an open order:
 1. Open a submitted order.
 2. Click the Billing and Invoice tab.

You can access the Invoice information from this page, if it is generated. Else, create a Pro Forma Invoice as needed. See [Viewing the Billing and Invoice Tab](#).
- From Cisco Commerce Orders tab:
 1. From Cisco Commerce Orders tab drop-down menu options, click **Invoices**.

You can access all invoices on the Invoices page. Search, export, print, or tag invoices using the common utilities available here (see [Getting Started with Cisco Commerce User Guide](#)).

The Powerful Pre-Sales Capabilities of Cisco Commerce

Check out this video to see how you can use established Build and Price features to manage your configurations, collaborate seamlessly with customers, partners and Cisco Sales, and streamline your overall experience.

11.3 Paying Invoices

To pay open invoices with a credit card, complete the following steps:

1. Ensure the credit card is enabled as a valid payment method in Cisco Commerce My Profile and Preferences (see [Getting Started with Cisco Commerce User Guide](#)).
2. From the Invoices page, click **Pay Invoices**. The list of available invoices displays.
3. To pay part of an invoice, click the fields in the Amount to Pay column. Enter the partial amount for that line item. Portions of multiple invoices can be paid at one time.
4. Alternatively, to pay the full amount of an invoice, check the Pay in Full checkbox that corresponds to the desired invoice line. Multiple invoices can be paid at one time.
5. Alternatively, in order to pay all of the outstanding invoices, check the Pay in Full checkbox at the top of the column.

Available Invoices

									Total Amount	5089.32

Available Invoices Page: With Selections

Note: It is important to note that there are three different options for paying invoices.

- Checking the Pay in Full checkbox at the top of the column will result in payment of all the outstanding invoices.
 - Checking the Pay in Full checkbox on the appropriate line(s) will result in payment of that/those specific invoice(s).
 - Entering a portion of the remaining balance of an invoice in the Amount to Pay field on the desired line(s) will result in payment of that dollar figure against that/those specific invoice(s).

6. Click **Continue to Pay** to proceed with authorization. The page refreshes. The default credit card displays in color. Alternate credit cards display in grey.
 7. Verify the invoice(s) and the amount(s) to be paid.
 8. To select a credit card other than the default, click the desired card. The selected card becomes the default card. For more information on credit cards, see [Populating the Payment Information Section](#).

Note: You can add a new card only under My Profile and Preferences (see [Getting Started with Cisco Commerce User Guide](#)).

9. Click **Authorize** Payment. The Confirm Payment dialog box displays.

11.3.1 View Activity

To view activity from the Invoices page, click the View Activity icon ().

Invoices Page: View Activity Icon

The Activity Summary page displays. Any activity on the account displays under the Transaction Activity section.

Activity Summary Page

11.3.2 Searching for Disputes

You can access disputes from several locations within Cisco Commerce:

1. On the Order Details page: Items tab, Add Dispute is an option in the common utilities. Selecting this icon will take you to the disputes page where all invoices associated with the Sales Order will be displayed. You will be able to add invoices or remove any invoices that are not in dispute. You will be able to create a dispute at the order, invoice, or invoice line level.

2. From the Invoices: Activity Summary page, click the Search Dispute icon to raise a dispute at the invoice or invoice line level. You will be taken to the dispute page where you can enter the dispute amount and reason. Depending on the selected dispute reason, additional fields will be displayed that will need to be completed.

Activity Summary

Invoice Disputes Page

10. On the Invoice Disputes page, the Comments box is read only; it displays the comments entered when the dispute was created.
11. Click **Back** to return to the Search Results page.

11.3.3 Creating a Dispute Request

To create a dispute, complete the following steps:

1. From the Cisco Commerce Invoices page, click the Create Dispute icon for a particular order.
2. Alternately, from the Billing and Invoice tab: Invoice Sub-tab click the Add Dispute icon to raise a dispute at the invoice or invoice line level. The Dispute page displays.
Depending on the selected dispute reason, additional fields are displayed that will need to be completed.
3. Complete the required fields, indicated with a red asterisk (*).
4. To add additional invoices, click the Included Invoice icon (). The Invoice pop-up window displays.

Billing and Invoice Tab: Invoices Page: Add Dispute Form

5. If applicable, check the checkbox for particular invoices to include that invoice in the dispute.
6. To add a line item, click the Include Line Items ().
7. If applicable, check the checkbox(es) corresponding to the desired line(s) to add additional line items to the dispute.
8. To add attachments, click **Add** and select the appropriate file.

Included Invoice Section: Invoice Pop-up Window

Include Line Items

9. Click the Choose Any drop-down arrow in the Dispute Items section.
10. Choose a reason for the dispute. Depending on which option is selected, different fields display to provide additional info.
11. The Comment & Description field is optional. Any information entered here displays when the dispute is viewed.
12. Click **Submit**. A service request number is sent via e-mail. Once the request is validated, a Dispute/SAF number is sent via e-mail.

12 Managing Returns

You can view and manage your returns through Cisco Commerce Returns option on the Orders tab. To view more information on returning a product, see the [Returns page](#).

On the Returns page, you can search for returns using Cisco Commerce search functionality (see [Getting Started with Cisco Commerce User Guide](#)).

The screenshot shows the Cisco Commerce Returns interface. At the top, there's a navigation bar with links for Catalog, Estimates, Deals & Quotes, Orders (which is highlighted in blue), Services & Subscriptions, and Software. Below the navigation is a search bar with the placeholder "Search All...". A message box at the top left says "Return Request procedures may vary by Country and Region. Click the 'Start Return Request' button for details." On the left, there's a sidebar with a dropdown for "AA/AAR No.", a search input, and buttons for "Advanced Search" and "All Returns". The main area displays a table with 51 results. The columns include checkboxes, Last Modified, AA/AAR No., Sales order No., AA/AAR Status (with a dropdown arrow), Ref. Sales Order No., Bill To, Created By, and CTMP Quote No. At the bottom right of the table, there's a red-bordered button labeled "Start Return Request". Above the table, there are links for Export, Print, Add Tag, and Edit View.

Cisco Commerce Returns Page

To initiate a return request, click **Start Return Request**. The Returns Request page displays.

Returns request procedures may vary depending on country or region.

13 Using the Common Utilities

You can view, export, print, e-mail, share, delete, tag, save as an estimate, or clone an order using the common utilities. You can access these utilities from:

1. The Orders tab
2. Within an order: Order Page

	Order Name	Sales Order No.	Web Order ID	Status	Early Shipment	Requested Ship Date
<input checked="" type="checkbox"/>	mw1	102274795	68474602	BOOKED	Yes	27 May 2016
<input type="checkbox"/>	Test_MDM_RA		68475599	UNSUBMITTED	Yes	

Cisco Commerce: Orders Tab

Orders Page: Common Utilities

Best Practice: Use the common utilities, such as Export, Print, Share, or Tag from the Orders tab to export, print, share, or tag multiple orders at once (see [Getting Started with Cisco Commerce User Guide](#)).

See the [Getting Started with Cisco Commerce User Guide](#) to export, print, share, or email an order. The process is same as exporting, printing, sharing, or email multiple orders at once.

13.1 Searching for an Order

You can search for orders using the Cisco Commerce search functionality (see [Getting Started with Cisco Commerce User Guide](#)).

Note: Orders with “Closed” status remain searchable for 15 months from the date of closing. Once archived, open a case through [Customer Service Central](#) to access them.

Other orders that are not closed remain searchable indefinitely.

You can also search for your favorite orders using Advanced Search functionality (see [Getting Started with Cisco Commerce User Guide](#)).

The screenshot shows the 'Advanced Search' interface. On the left, there's a sidebar with links: 'All Orders', 'Recent Orders', 'Shared Orders', 'Saved Searches', and 'View Tags'. The main area has fields for 'View By' (set to 'All Orders'), 'Order Name', 'Sales Order No.', 'Web Order ID', 'Deal ID', and 'Purchase Order No.'. At the top right are 'Reset' and 'Search' buttons.

Cisco Commerce Orders Tab: Advanced Search

13.1.1 Viewing and Creating a Backlog Report

You can view the status and related information of a large number of orders in Cisco Commerce. The backlog reports can be accessed for up to a year. To view reports, complete the following steps:

1. Click Advanced Search in the Cisco Commerce Orders tab. The advanced search for orders section displays.
2. To narrow the search, select dates in the Submit Date Range.
3. In the Order Status field, check the checkbox for Backlog Report.
4. Click **Search**. The search results display.

The screenshot shows the 'Advanced Search' page with the 'Order Status' section expanded. It lists various order status options with checkboxes: All Status, Unsubmitted, Submitted, Pending Approval, Booked, In Progress, Completed, Orders Shipped or Partially Shipped, Scheduled to ship, Cancellation in Progress, Cancelled, and Currently on HOLD. A red circle with the number '3' is drawn around the 'Backlog Report' checkbox, which is checked. At the bottom are 'Cancel' and 'Search' buttons.

Advanced Search Page

5. Check the box next to the rows for which the backlog report needs to be generated. To select all rows, check the box at the header level.
6. Click **Export**. The Export Options window displays.
7. Using the Add and Remove buttons, select the columns to include in the report.
8. In the file type drop-down menu, select CSV Entire Order (Comma Separated Values).
9. Click **Export**. The report is generated and you will receive an email once it's ready. You can then click **Download Reports** to access the report.

13.2 Deleting an Order

Only unsubmitted orders can be deleted. Deleting an order permanently removes the record and all related data. Be advised that once deleted, it cannot be retrieved.

To delete an order, complete the following steps:

1. Click **Delete**.

The screenshot shows the Order Page for a purchase order named "testordermw1". The page includes fields for Purchase Order ID (67686894), Web Order ID (67686894), Status (UNSUBMITTED), and Smart Account (Assign Smart Account). Below these are tabs for Items, Discounts, Shipping and Install, Billing, and Review and Submit. At the top right, there are links for Favorites, Export, Print, Email, Share, and More. The "Delete" button is highlighted with a red box and has a circled '1' above it.

Order Page: Delete

2. The Delete dialog box displays. The system displays a warning message that this will delete the order permanently.

Delete Dialog Box

3. To permanently delete the order, click **Delete**.
4. To cancel and return to the Order Page, click **Cancel**.

13.3 Saving an Order as an Estimate

When you create and configure an order, the configuration can be named and saved to be reused. The system will save the configuration as an estimate and you will receive an estimate ID.

Note: The Save as Estimate icon does not display on RNSD orders.

To save the configuration set, complete the following steps:

1. From the Order page: Items tab, click **Save as Estimate**. The Save as Estimate dialog box displays.

Save as Estimate Dialog Box

2. Click the Estimate Name field and enter the appropriate information.
3. Click the Description field and enter the appropriate information.
4. Click **Save**. A Save as Estimate dialog box refreshes with a success message that indicates the estimate ID.

Save as Estimate Dialog Box

Best Practice: Make note of the estimate ID from the refreshed Save as Estimate dialog box.

5. Click **OK**. The dialog box closes, and the Order page: Items tab displays.

To reuse the configuration, import a saved configuration to the order (see [Importing an Estimate](#)).

13.4 Cloning an Order

When you create and configure an order, the order can be cloned and edited. **Clone Order** in the Common Utilities bar begins the Order process by cloning the open order (see [Creating a New Order by Cloning an Order](#)).
